

AA707

1/4" NPT or BSPT (M)
ABS or PPS

FEATURES AND BENEFITS

- WindJet nozzles are available in a wide range of patterns, sizes and materials.
- **Key feature overview for 707 WindJet nozzles:**
 - Produce a tightly directed round spray pattern with minimal noise levels.
 - Extended ribs protect the recessed orifices against external damage.
 - Ribs provide an air escape should the nozzle be placed against a flat surface and accommodate a deep well socket.
 - Aluminum and stainless steel versions feature interchangeable caps that control air usage.
 - Aluminum caps are color coded for easy identification of flow rates.

AA707-AL

1/4" NPT or BSPT (M)
Aluminum

OPTIMIZATION TIPS

- See page J2 for optimization tips.

APPLICATIONS

- Moving of materials
- Parts cleaning/drying
- Parts cooling

AA707-SS

1/4" NPT or BSPT (M)
Stainless Steel
