CATALOG TABLE OF CONTENTS

Spraying Systems Co.®
Experts in Spray Technology

INDUSTRIAL HYDRAULIC SPRAY PRODUCTS

spray.com

THANK YOU FOR YOUR INTEREST IN OUR SPRAY PRODUCTS

WE'RE LOOKING FORWARD TO HELPING YOU OPTIMIZE YOUR OPERATIONS INVOLVING SPRAY TECHNOLOGY. HERE ARE JUST A FEW WAYS WE CAN ASSIST:

- You'll find the most extensive line of high-quality hydraulic spray products available in this catalog. However, if you don't find exactly what you need, be sure to contact us. Our flexible manufacturing capabilities enable us to make products in additional sizes and materials quickly and efficiently. Special designs are also possible. Just tell us what you need.
- Need a different type of spray solution? Or a spray product for a specific application? Visit **spray.com** to find additional catalogs on these product lines:
  - Air Atomizing, Automatic Spray Nozzles and Spray System Controllers
  - Handheld GunJet® Spray Guns
  - WindJet® Air Products
  - TankJet® Tank Cleaning Products
  - SprayDry® Nozzles
  - Pulp and Paper Spray Products
  - Steel Industry Spray Products
- On-site sustainability assessments, tank cleaning evaluations, nozzle maintenance workshops and lunch and learn sessions are just a few of the many services we provide. It's easy to take advantage of these programs – just contact your local representative. You'll find a spray expert nearby – we have hundreds of technical sales and service people in more than 90 sales offices around the world.
- Need a device to deliver fluid to your nozzles? Talk to us about headers, manifolds, lances, injectors and more.

These are just a few of the ways we can help you get the results you need from your spray systems; you'll learn about others in the pages that follow. Please be sure to visit **spray.com** or contact us whenever you need assistance – we're here to serve you.

Thank you – we value your business!

MAKE EVERY **DROP COUNT**

Visit **www.spray.com/results** to see how we partner with customers to reduce water, energy and chemical use, minimize waste and scrap, improve worker and food safety and more. This library of case studies includes details on sustainability improvements and resulting benefits. Let us help you make every drop count.

TABLE OF CONTENTS

THE PRODUCTS YOU NEED AND PERFORMANCE YOU CAN COUNT ON

You'll find tens of thousands of hydraulic spray nozzles in this catalog but you can also visit **spray.com** to see tens of thousands more. Featured products include air atomizing nozzles, automatic hydraulic and pneumatic nozzles, handheld spray guns, tank cleaning equipment, air nozzles and nozzles for specialized operations like descaling, trim squirt, spray drying, fire protection and more. We offer nozzles in more sizes and materials than any other supplier, so you're sure to find a product that delivers the performance you need.

PRECISE, DEPENDABLE PRODUCT QUALITY

Your satisfaction is important to us. Our products are manufactured to exacting standards to deliver the promised performance each and every time you order. We are ISO 9001:2015 and 14001:2015 certified. Products ship only after undergoing our rigorous quality control and testing programs. If you have any concerns about the quality of any of our products, contact us immediately. We will address your issues and take corrective action as needed.

PRODUCTS WHEN YOU NEED THEM

Most of our spray nozzles are readily available and will be shipped within days of your order. If you need expedited service, let us know. Our twelve manufacturing locations are strategically located around the world to help ensure we can get our products where they are needed quickly and cost-effectively.

SPECIAL REQUIREMENTS? TELL US WHAT YOU NEED.

If one of our standard products isn't quite right for your equipment, just let us know. Customization can range from simple changes in materials to specially-designed nozzles to meet exacting performance requirements.

We work with hundreds of OEMs and provide services like these:

- Special nozzle designs
- Private labeling with unique part numbers
- Special packaging
- Customized maintenance and operating instructions

THE SERVICES YOU NEED, WHEN AND WHERE YOU NEED THEM

OUR SOLE FOCUS ON SPRAY TECHNOLOGY ENSURES RESULTS IN YOUR OPERATIONS

Since spray technology is all we do, we have a level of expertise that can't be matched. Our sales engineers are factory-trained and only sell our spray products. Need to increase throughput in a coating operation? Eliminate waste or lower scrap? Cool products more quickly? Suppress dust? Minimize water and chemical use in cleaning operations? Just give us a call. With sales offices on six continents and more than 90 sales offices, we are in your area and ready to help.

WHAT CUSTOMERS SAY ABOUT OUR SERVICE

"We are very pleased with Spraying Systems Co. Wish all vendors were as good."

"Very pleased – awesome is the best way to describe Spraying Systems Co. service."

"A+ on service. Sales engineer responded quickly and visited my facility to review various product options for my application."

"Rep always provides prompt answers. Knows the full product line inside and out."

"I get more technical support from Spraying Systems Co. than any other vendor."

"The local rep came right out – didn't even know the size of the project at the time."

"Spraying Systems Co. provides solutions – not just parts."

"More knowledgeable than any other equipment company we work with."

"We get the products we need, when we need them. Each and every time we order."

ADDITIONAL EQUIPMENT TO OPTIMIZE SPRAY NOZZLE PERFORMANCE

SPRAY CONTROL

Spray nozzles can only perform properly if the entire spray system is operating efficiently. That's why we offer a wide range of AutoJet® spray controllers. Choose from basic automatic control, monitoring of spray variables or automatic adjustments of spray variables based on what is happening in your process. Adding a spray controller can help:

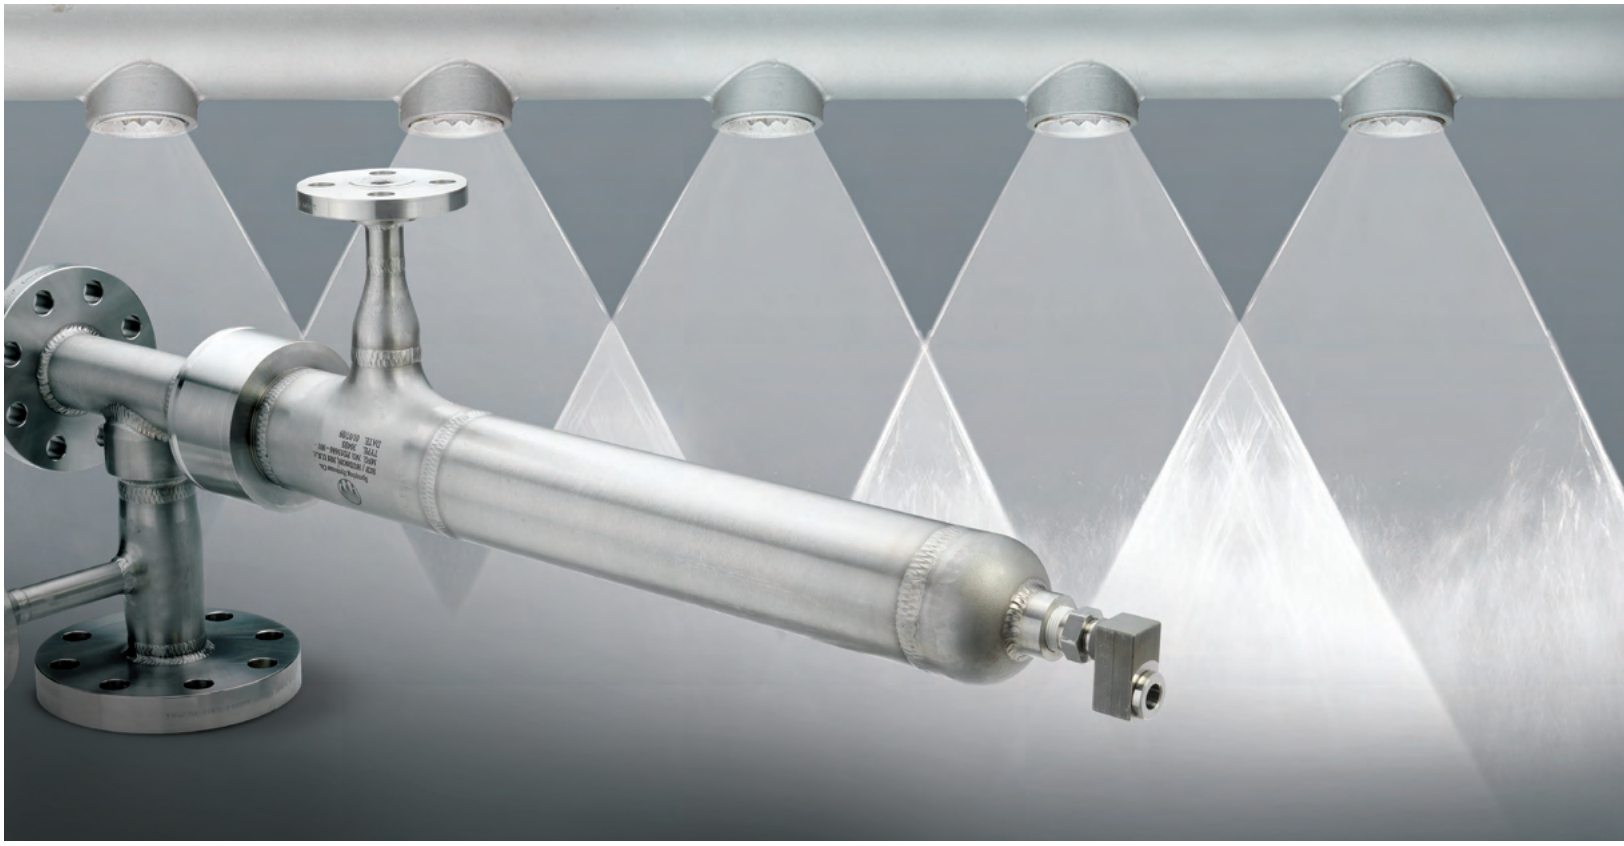
- Increase production through automation and enable operation at variable line speeds
- Reduce labor costs by eliminating manual operation, system monitoring and changeover of nozzles between batches
- Lower operating costs by eliminating overspray and waste through precision spraying
- Improve worker safety by minimizing exposure to harmful chemicals

Application-specific systems are also part of our offering for more demanding spray operations.

TURNKEY SYSTEM OPTIONS

- AccuCoat® Heated Spray Systems for viscous food coatings
- Precision Spray Control Systems for uniform coverage on the target and nowhere else – even when line speeds change
- AutoJet® Food Safety Systems for the application of antimicrobials and mold inhibitors
- PanelSpray® Systems for engineered wood products
- AutoJet Precision Lubrication Systems for oil application and mold release
- AutoJet Gas Cooling Systems for pollution control

Additional options include systems for dust suppression, NOx control and humidification. Check with your local sales office; system availability may vary by region.



HEADERS AND INJECTORS

The equipment that supplies fluid to spray nozzles can have a big impact on performance. If the fluid flow isn't adequate or the fluid delivery devices aren't suitable for the operating environment, the entire process is in jeopardy. Unlike feed devices built by fabricators or in-house staff, our spray headers, manifolds, showers, injectors, lances and quills are designed to optimize the performance of our spray nozzles and streamline your operations.

You can specify the length, number of nozzles, nozzle spacing and connection type for most of our manifolds and headers. Spray injectors can also be customized. You can specify nozzle type, nozzle placement, materials, coatings and any specialized testing required.

The next time you order spray nozzles, take a moment to consider your fluid delivery equipment. Talk to your local sales engineer about ways to ensure optimal performance and streamline operations.

PRODUCT OPTIONS INCLUDE:

- Basic spray nozzle manifolds with a C-channel to facilitate spray nozzle set-up and adjustment
- Pipe-in-pipe spray manifolds with nozzles mounted inside a slotted pipe for protection against build-up and damage
- Modular spray manifolds with easy-to-access tubing and fittings to simplify set-up and cleaning
- Built-to-order spray manifolds
- Automatic brush showers that keep nozzles clean without process interruption or maintenance downtime
- Built-to-order spray injectors for use in demanding environments such as refineries, power plants and chemical production
- Spray quills and lances for use in environments where spray performance is less critical

PERFORMANCE VALIDATION BEFORE YOU BUY

TESTING SERVICES HELP ENSURE PRECISION SPRAY PERFORMANCE

In new spray applications or applications where spray performance is critical, it is important to understand how factors like these affect performance:

- Operating conditions such as pressure, temperature and variable line speeds
- The liquid being sprayed
- The placement and position of nozzles in relation to the target

In many cases, experience and theoretical calculations can provide an indication of actual spray performance. However, testing in our spray labs determines actual performance and can eliminate costly specification mistakes or quality problems after installation. During testing, we can adjust operating conditions and/or test different nozzles until we find the exact spray performance required in your application.

Common tests include:

- Spray characterization
- Drop size distribution
- Spray impact
- Spray pattern
- Spray coverage
- Spray angle
- Evaporation rate
- Residence time
- Dwell time

A LOOK INSIDE OUR LABS

Evaluating sprays requires very specialized equipment. In fact, some of our equipment was designed by our spray engineers and is used only in our facilities. Our test equipment includes:

- Spray patternators to measure spray distribution
- Impact testers to determine impact throughout a spray
- Laser diffraction and Phase Doppler particle size analyzers to measure drop size and spray velocity
- Laser sheet imaging analyzers to evaluate spray shape and distribution
- Wind tunnel to determine the effects of air currents and gas flows on sprays

ADVANCED MODELING SERVICES AND MANUFACTURING CAPABILITIES FOR COMPLEX AND DEMANDING APPLICATIONS

It is not feasible to replicate operating conditions for every application. Gas cooling, chemical injection, spray drying and tablet coating are just a few applications where we cannot spray the liquids used for safety reasons or procure comparable process equipment. Yet, in these applications, understanding spray performance is often critical to process efficiency, product quality, equipment longevity and even worker safety. That's when we use sophisticated modeling tools to predict spray performance.

- Computational Fluid Dynamics (CFD) models illustrate flow patterns, velocity, temperature, gas/liquid distributions, droplet trajectories, internal system pressure and more in scrubbers, towers, ducts and dryers. Our models use data we've collected in our spray labs to reduce the error factor and precisely predict spray performance
- Fluid Structure Interaction (FSI) examines the interaction between fluid dynamics and structural integrity. This enables us to determine the materials required to withstand mechanical stresses such as load, pressure, turbulence, corrosion and more

Demanding applications often require the use of special materials and compliance with various manufacturing codes and testing standards. We can produce nozzles, quills, injectors and headers to exacting standards and conduct a wide range of tests to validate construction.

MANUFACTURING AND TESTING CAPABILITIES

Manufacturing:

- ASME® Boiler and Pressure Vessel Code
- ASME B31.1 Power Piping Code
- ASME B31.3 Process Piping Code
- Welding to ASME B&PV Code Section IX
- cGMP
- Canadian Registration Number requirements

Testing in accordance with ANSI®, ASTM® standards:

- Ultrasonic
- Radiographic
- Liquid penetrant
- Hardness
- Hydrostatic
- Magnetic particle examination
- Positive material identification

See Trademark Registration and Ownership, page i-1.

Learn more about our testing and modeling services at sprayanalysis.com

HOW YOU CAN BENEFIT FROM SPRAY SYSTEM OPTIMIZATION

WAYS TO LEARN MORE

EXPERT ADVICE AT YOUR PLANT

Sustainability Assessments – Invite our team of experts to evaluate your cooling, coating, cleaning, drying, mixing or other operations. We will identify ways to:

- Reduce water, chemical and energy use
- Reduce scrap and waste
- Reduce risk and improve safety

Complimentary Lunch and Learn workshops – Select a topic, choose a date and invite your colleagues. We'll provide lunch and an informative 60-minute session. Popular topics include *Spray Nozzle Basics, Understanding Drop Size and How to Reduce Use of Costly Chemicals*.

Spray demos and proof-of-concept trials at your facility – Your local sales engineer will conduct demos and tests on-site so you can see how a product will work in your environment. When operating conditions don't allow an on-site demo or test, other arrangements can be made.

TESTS AND DEMONSTRATIONS AVAILABLE AT REGIONAL SPRAY TECHNOLOGY CENTERS

Throughout North America, we have several Spray Technology Centers. These facilities are equipped to conduct proof-of-concept tests and technology demonstrations. Seminars including live demonstrations on various topics are also conducted throughout the year. Schedules vary by region so contact your local sales engineer for information.

MULTI-DAY SEMINARS FOR ADVANCED LEARNING

An in-depth seminar on the atomization and spraying of liquids is conducted twice a year at our facility in Wheaton, IL. Attendees spend time in the classroom and our fully equipped spray laboratories and participate in spray characterization tests. More information is available from your local sales engineer and at **sprayanalysis.com**.

EDUCATIONAL RESOURCES

Video demonstrations and tutorials on spray.com and YouTube.com/sprayingsystems

Explore our video library and learn about new spray products and techniques; best practices in maintenance procedures; what to look for in a spray pattern and more.

Informational reference material on spray.com

- *Optimizing Your Spray System*, Technical Manual 410
- *Three Simple Ways to Dramatically Reduce Water Use,* White Paper 116
- *Dramatically Reduce Chemicals, Lubricants & Other Coatings Without Compromising Quality,* White Paper 117
- Plus a wide range of industry- and application-specific technical bulletins filled with selection, optimization and maintenance tips

Case studies on spray.com

More than 200 case studies demonstrate how processors have improved operating sustainability, increased production and lowered costs by optimizing cooling, coating, cleaning, lubricating, drying and other applications using our spray technology. See **spray.com/results**.

Catalogs on spray.com

- Air Atomizing and Automatic Air Atomizing Nozzles
- Hydraulic Nozzles
- TankJet® Tank Cleaning Products
- WindJet® Air Products
- SprayDry® Nozzles
- Spray Technology for Steelmaking
- Spray Technology for Pulp and Papermaking
- Car Wash Products
- GunJet® Handheld Spray Guns

SELECTION GUIDELINES

Use this general guide as a starting point if you're not sure which type of nozzle to use in your spray operation. However, keep in mind that performance varies based on operating conditions, so be sure to contact your local representative for assistance.

ABSORBER TOWERS

FullJet®, SpiralJet® and DistriboJet® full cone nozzles	Section B
WhirlJet® hollow cone nozzles	Section D

AIR PRODUCTS

See **spray.com** for information on WindJet® compressed air and blower-powered air knife packages.

AIR WASH

FullJet and SpiralJet full cone nozzles	Section B
WhirlJet hollow cone nozzles	Section D

AIRLESS SPRAYING

See **spray.com** for information on automatic spray nozzles and tungsten carbide spray nozzles.

AUTOMATED SPRAYING

See **spray.com** for information on automatic spray nozzles, AutoJet® spray controllers and turnkey spray systems for precision coating, gas cooling, lubrication and more.

CLEANING: TANK

See **tankjet.com** for information on our full line of TankJet® tank cleaning equipment.

COATINGS AND ADDITIVES

Fine spray nozzles	Section E
VeeJet® flat spray nozzles	Section C
WhirlJet hollow cone nozzles	Section D

See **spray.com** for additional information on air atomizing nozzles, automatic spray nozzles and turnkey coating systems.

COOLING: IN PROCESS

FullJet and SpiralJet full cone nozzles	Section B
FloodJet® flat spray nozzles	Section C
WhirlJet hollow cone nozzles	Section D

COOLING: GAS

SpiralJet full cone nozzles	Section B
SpiralJet and WhirlJet hollow cone nozzles	Section D

See **spray.com** for additional information on two-fluid nozzles for gas cooling and turnkey gas cooling and pollution control systems.

DESCALING

See **spray.com** for information on descaling and other spray products for steelmaking.

DUST CONTROL

ETCHING AND RINSING

FIRE PROTECTION

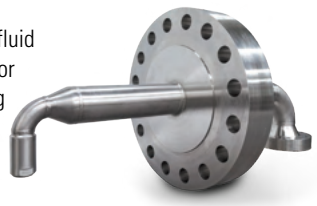
FOAM CONTROL

HUMIDIFICATION

See **spray.com** for information on air atomizing and automatic spray nozzles.

SCRUBBERS: GAS CONDITIONING

See **spray.com** for information on two-fluid nozzles for gas cooling, spray injectors for gas conditioning and turnkey gas cooling and pollution control systems.



SCRUBBERS – WET

SPRAY DRYING

See **spray.com** for information on SprayDry® nozzles.

SPRAY PONDS – EVAPORATING AND COOLING

WASHING – CONVEYOR

WASHING – MIST ELIMINATOR

WASHING – PARTS

ORDERING PRODUCTS

In each product section, you'll find ordering examples. Start by reviewing the example and then create the part number by indicating the inlet connection, material and capacity size.

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example

1/4	G	–	SS	10

For your convenience, there are multiple ways to place an order: phone, fax and online.

In the U.S. and Canada
Phone: 1.800.95.SPRAY | Fax: 1.888.95.SPRAY

Outside the U.S. and Canada
Phone: 1.630.665.5000 | Fax: 1.630.260.0842

Online ordering with a credit card is also available. Visit **spray.com/ispray**. You'll find helpful selection tools and a Live Chat option for immediate assistance.

FINDING PRODUCTS

- Consult the Product Index on **page i-4** if you know the name of the product
- Consult the Part Number Index on **page i-8** if you have the part number. Part numbers are shown numerically and alpha-numerically
- If you're not sure what you need, our Selection Guidelines on **pages 10-11** will help you identify products typically used in dozens of applications

Selection assistance is also available by calling **1.800.95.SPRAY.** Representatives in your local sales office will help you determine which products best meet your application requirements. (Call **1.630.665.5000** outside North America or visit **spray.com** to find information for the sales office in your area.)

TECHNICAL REFERENCE

TABLE OF CONTENTS

Spray nozzles are precision components designed to yield very specific performance under specific conditions. To help you determine the best nozzle type for your application, the following chart summarizes the performance that each nozzle type is designed to deliver. Visit **youtube.com/sprayingsystems** for video demonstrations of spray patterns.

The spray pattern images on the right were acquired in our spray laboratories using Laser Sheet Imaging (LSI). LSI images are collected by passing a laser sheet through a cross-section of the spray plume and imaging with a light-filtered camera. The distributions are directly proportional to the surface area distribution of the sprayed material (red: high; blue: low; black: zero). Volume distributions typically are similar to surface area distributions for these nozzles, depending on the local drop size distributions.

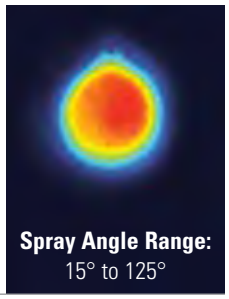
LASER SHEET IMAGE

FULL CONE NOZZLES

- Uses a unique internal vane design to produce a solid cone-shaped spray pattern
- Spray pattern consists of medium- to large-sized drops

Typical applications:

- Chemical injection
- Dust suppression
- Fire protection
- Metal cooling
- Washing/rinsing



Spray Angle Range: 15° to 125°

FULL CONE (SPIRAL-TYPE) NOZZLES

- Produces a solid cone-shaped spray pattern when the fluid exits the voids in the spiral
- Spray pattern is not as uniform as full cone nozzles with an internal vane
- Spray pattern consists of relatively coarse drops

Typical applications:

- Dust suppression
- Fire protection
- Flue gas desulfurization (FGD)
- Quenching

Spray Angle Range: 50° to 170°

FULL CONE (OVAL SPRAY) NOZZLES

- Uses a unique internal vane to produce a solid cone-shaped spray pattern with oval impact area with a width approximately one-half its length
- Spray pattern consists of medium- to large-sized drops

Typical applications:

- Air/gas washing
- Cooling and quenching
- Dust control
- Fire suppression

Spray Angle Range: 60° to 105°

FULL CONE (SQUARE SPRAY) NOZZLES

- Uses a unique internal vane to produce a solid cone-shaped spray with square impact area
- Spray pattern is uniform across entire spray area
- Spray pattern consists of medium- to large-sized drops

Typical applications:

- Air/gas washing
- Cooling and quenching
- Dust control
- Fire suppression

Spray Angle Range: 52° to 105°

LASER SHEET IMAGE

FLAT (EVEN) NOZZLES

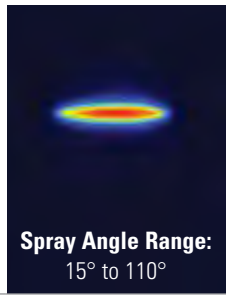
- Provides even distribution of medium-sized drops throughout the thin, rectangular spray pattern
- When used on a header, nozzles are positioned for edge-to-edge pattern contact

Typical applications:
- Coating
- Cooling
- Moisturizing
- Washing

FLAT SPRAY (TAPERED) NOZZLES

- Produces a tapered-edge flat spray pattern
- Used on spray headers to provide uniform coverage as a result of overlapping distributions

Typical applications:
- Descaling
- High-pressure cleaning
- Label removal



FLAT SPRAY (DEFLECTED-TYPE) NOZZLES

- Uses a deflector surface to form an even flat spray pattern consisting of medium-sized drops
- Large free passage design reduces clogging through the round orifice

Typical applications:
- Showers in papermaking
- Washing

HOLLOW CONE (WHIRLCHAMBER-TYPE) NOZZLES

- Uses a whirlchamber to rotate the fluid and produce a circular spray pattern
- Ideal for use when a combination of small drop size and higher capacity is needed

Typical applications:
- Air, gas and water cooling
- Cooling products on conveyors
- Dust control
- Flue gas desulfurization (FGD)
- Water aeration

HOLLOW CONE (DEFLECTED-TYPE) NOZZLES

- Uses a deflector cap to form an umbrella-shaped hollow cone pattern

Typical applications:
- Decorative spray
- Dust suppression
- Fire protection
- Flush cleaning of tube/pipe interiors
- Water curtain

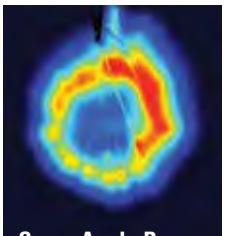
LASER SHEET IMAGE

HOLLOW CONE (SPIRAL-TYPE) NOZZLES

- Produces a circular spray pattern when the fluid exits the voids in the spiral
- Drops are slightly coarser than those in other hollow cone sprays
- Provides a high flow rate in a compact nozzle size
- One-piece design produces maximum throughput for a given pipe size

Typical applications:

- Dust suppression
- Fire protection
- Flue gas desulfurization (FGD)



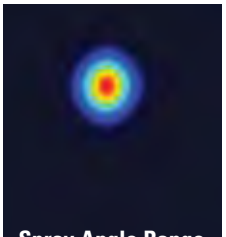
Spray Angle Range
50° to 180°

SOLID STREAM NOZZLES

- Produces a solid stream spray with the highest impact per unit area

Typical applications:

- Cleaning products when complete removal of dirt and debris is required
- Decorative spray ponds
- Laminar flow operations



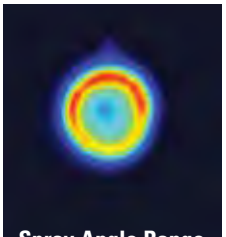
Spray Angle Range
0°

ATOMIZING (HYDRAULIC, FINE MIST) NOZZLES

- Produces a finely atomized, low capacity spray in a hollow cone pattern without use of compressed air

Typical applications:

- Dust suppression
- Evaporative cooling
- Moisturizing
- Spray drying



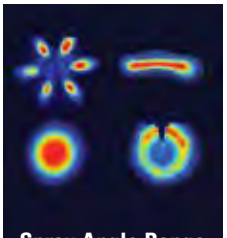
Spray Angle Range
35° to 165°

AIR ATOMIZING AND AIR ASSISTED NOZZLES

- Produces a variety of cone and flat spray patterns through atomization of liquid by compressed air
- Internal mix impingement atomization forms very fine drops

Typical applications:

- Coating
- Evaporative cooling
- Humidification
- Moisturizing



Spray Angle Range
18° to 360°

CAPACITY – FLUID CAPACITY VARIES WITH SPRAYING PRESSURE

The relationship of pressure and flow with a given orifice is:

$$\frac{Q_1}{Q_2} \sim \frac{(P_1)^n}{(P_2)^n}$$

Q = Flow Rate (in gpm or lpm)
P = Liquid pressure (in psi or bar)
n = Flow exponent

To approximate any unknown flow or pressure, use this formula when the other variables are known. The "n" exponent is used to approximate the ratio of pressure to flow based on the type of spray pattern.

Example:

To determine the flow rate of water for a 1/4G-10 standard full cone nozzle at 150 psi or at 10 bar, consult the performance charts in this catalog.

You will find that:

- The spray angle is 65°
- Flow (Q_1) at 40 psi = 1.9 gpm
- Pressure (P_1) = 40 psi
- Pressure (P_2) = 150 psi

Solving for Q_2 = 3.5 gpm

$$Q_2 = \frac{Q_1}{(P_1/P_2)^n} = \frac{1.9 \text{ gpm}}{(40/150)^{.46}}$$

- The spray angle is 65°
- Flow (Q_1) at 3 bar = 7.5 lpm
- Pressure (P_1) = 3 bar
- Pressure (P_2) = 10 bar

Solving for Q_2 = 13 lpm

$$Q_2 = \frac{Q_1}{(P_1/P_2)^n} = \frac{7.5 \text{ lpm}}{(3/10)^{.46}}$$

FLOW EXPONENT FOR SPECIFIC NOZZLE TYPES

Nozzle Type	Exponent "n"
Hollow Cone Nozzles – All Full Cone Nozzles – Vaneless, 15° and 30° Series Flat Spray Nozzles – All Solid Stream Nozzles – All Spiral Nozzles – All	.50
Full Cone Nozzles – Standard, Square, Oval and Large Capacity	.46
Full Cone Nozzles – Wide Spray and Wide Square Spray	.44

Visit spray.com/sprayware for online flow rate and spray coverage calculators.

SPECIFIC GRAVITY

All capacity tabulations in this catalog are based on water. Since the specific gravity of a liquid affects its flow rate, tabulated catalog capacities must be multiplied by the conversion factor that applies to the specific gravity of the liquid being sprayed as explained below.

Specific gravity is the ratio of the density of a fluid compared to the density of water. The specific gravity of water is defined as 1. When spraying fluids other than water, specific gravity must be considered in the flow calculations.

$$Q_2 = Q_1(\text{water}) \times \frac{1}{\sqrt{SG}}$$

Using the previous example:

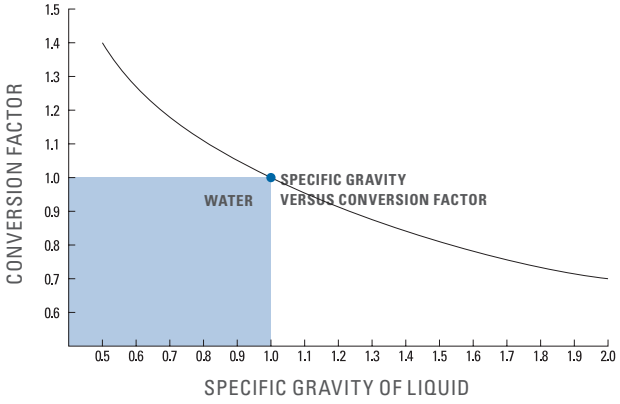
- Fluid sprayed is heavier than water and has a specific gravity of 1.4
- Flow of water at 150 psi = 3.5 gpm
- Heavy fluid (Q_2) = Q_1(water)*1/√1.4

$$Q_2 = \frac{3.5 \text{ gpm} * 1}{\sqrt{1.4}} = 2.95 \text{ gpm}$$

- Fluid sprayed is heavier than water and has a specific gravity of 1.4
- Flow of water at 10 bar = 13 lpm
- Heavy fluid (Q_2) = Q_1(water)*1/√1.4

$$Q_2 = \frac{13 \text{ lpm} * 1}{\sqrt{1.4}} = 11 \text{ lpm}$$

SPECIFIC GRAVITY VERSUS CONVERSION FACTOR

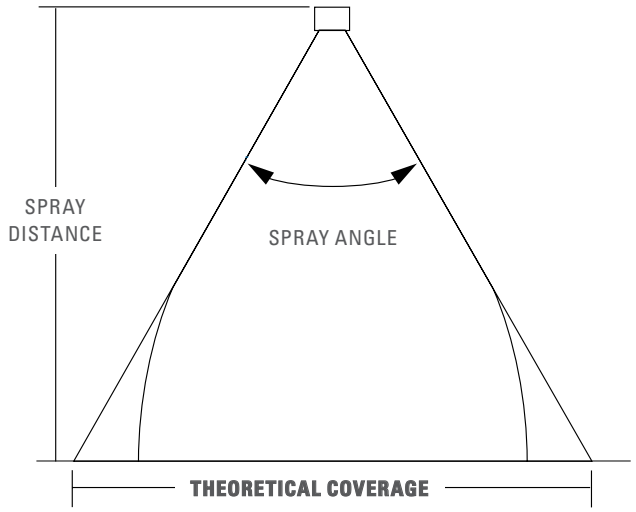


KEY: Conversion factor multiplied by the capacity of the nozzle when spraying water gives the capacity of the nozzle when spraying a liquid with a specific gravity corresponding to the conversion factor. This conversion factor accounts only for the effect of specific gravity on capacity and does not account for other factors affecting capacity.

SPRAY ANGLE AND COVERAGE

Tabulated spray angles indicate approximate spray coverage based on spray or distribution of water. In actual spraying, the effective spray angle varies with spray distance. Liquids more viscous than water form relatively smaller spray angles (or even a solid stream), depending upon viscosity, nozzle capacity and spraying pressure. Liquids with surface tensions lower than water will produce relatively wider spray angles than those listed for water. This table lists the theoretical coverage of spray patterns as calculated from the included spray angle of the spray and the distance from the nozzle orifice. Values are based on the assumption that the spray angle remains the same throughout the entire spray distance. In actual practice, the tabulated spray angle does not hold for long spray distances. If the spray coverage requirement is critical, request data sheets for specific spray coverage data.

Example: A spray nozzle with an angle of 65° spraying 15" (39 cm) from the target provides 19.2" (48.8 cm) of coverage



THEORETICAL SPRAY COVERAGE AT VARIOUS DISTANCES IN INCHES (CM) FROM NOZZLE ORIFICE

Spray Angle	2 in.	5 cm	4 in.	10 cm	6 in.	15 cm	8 in.	20 cm	10 in.	25 cm	12 in.	30 cm	15 in.	40 cm	18 in.	50 cm	24 in.	60 cm	30 in.	70 cm	36 in.	80 cm	48 in.	100 cm

PUMPS

Every operation using spray nozzles requires a method to provide fluid flow. Fluid flow can be provided by gravity, air pressure or mechanical pumps. It is important to understand that pumping systems provide flow, not pressure. Pressure is the result of restricting flow. The output of an unrestricted pump is 0 psi (bar). When a restriction is placed in the flow, line pressure will result.

The main types of pumps are positive displacement and centrifugal. There are others, but the operational principles are the same as for positive displacement and centrifugal pumps.

Positive displacement pumps

A fixed volume of fluid is delivered for every stroke of a piston, or plunger or rotation of a shaft. Examples include piston pumps, plunger pumps, peristaltic pumps and gear pumps. Positive displacement pumps provide high pressure, and regardless of the system characteristics, will deliver a fixed flow every rotation. These pumps must have an unrestricted bypass valve and a pressure relief valve.

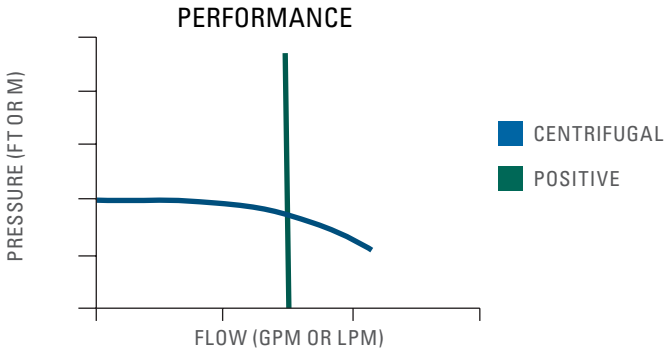
Centrifugal pumps (velocity pumps)

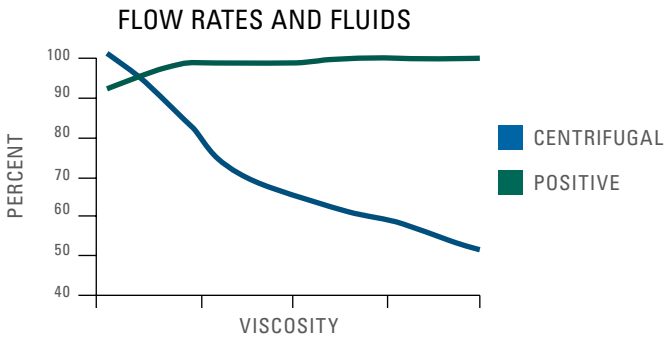
These pumps typically consist of a large vane (impeller) which is turned by a shaft inside a cavity (casing). The geometry of the impeller and casing moves the fluid in a tangential motion. The fluid gets restricted to a smaller volume and is then discharged into the system piping. These types of pumps typically operate at low pressure and high volume. They may also consist of several stages to increase the number of pressures available. These pumps have the unique feature of being able to run while the outlet is blocked. Since the pumps are velocity based, the impeller will spin in the casing fluid without "dead heading" the system itself. It will produce heat and may cavitate the fluid, but it will not build pressure like positive displacement pumps. However, a system bypass and pressure safety valve is still installed in the system to protect components.

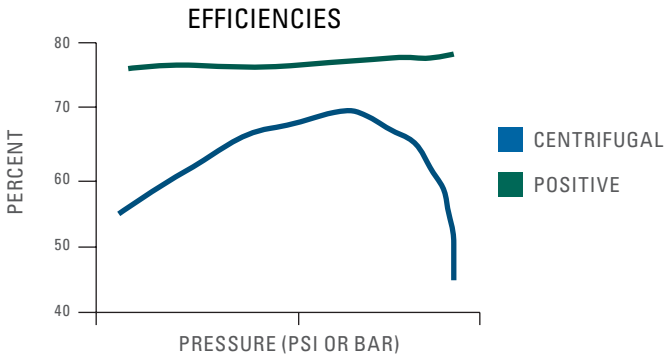
HOW PUMP TYPE AFFECTS NOZZLE SELECTION

The flow rates and pressures required by the system will determine the pump choice. There are many styles, sizes and types of pumps available but these general guidelines should prove helpful.

- High flows usually require a centrifugal style pump
- High pressures usually require a positive displacement pump
- Variable Frequency Drive (VFD) pumps may be an option. These pumps allow variable control of speed and flow rates
- Consider the fluid. Specific gravity will affect pump flow rates just as it affects nozzle flow rates
- Pump efficiencies, heat, available power, maintenance and plant conditions should also be considered







SPRAY DROP SIZE (ATOMIZATION)

Accurate drop size information is an important factor in optimizing spray nozzle performance, particularly in industrial applications such as gas cooling, gas conditioning, fire suppression and spray drying.

Drop size refers to the size of the individual spray drops that comprise a nozzle's spray pattern. Each spray provides a range of drop sizes; this range is referred to as drop size distribution. Drop size distribution is dependent on the spray pattern type and varies significantly from one type to another. The smallest drop sizes are achieved by air atomizing nozzles while the largest drops are produced by full cone hydraulic spray nozzles.

ACTUAL DROP SIZES

- 500 µm
- 1200 µm
- 5500 µm

One inch = 25,400 µm
One millimeter = 1,000 µm
µm = micrometers

Liquid properties, nozzle capacity, spraying pressure and spray angle also affect drop size. Lower spraying pressures provide larger drop sizes. Conversely, higher spraying pressures yield smaller drop sizes. Within each type of spray pattern the smallest capacities produce the smallest spray drops, and the largest capacities produce the largest spray drops.

DROP SIZE BY SPRAY PATTERN TYPE AT VARIOUS PRESSURES AND CAPACITIES

Spray Pattern Type	10 psi (0.7 bar)			40 psi (2.8 bar)			100 psi (7 bar)		
	Capacity		VMD	Capacity		VMD	Capacity		VMD
	gpm	lpm	microns	gpm	lpm	microns	gpm	lpm	microns
Air Atomizing	.005 .02	.02 .08	20 100	.008 8	.03 30	15 200	12	45	400
Fine Spray	.22	.83	375	.03 .43	.1 1.6	110 330	.05 .69	.2 2.6	110 290
Hollow Cone	.05 12	.19 45	360 3400	.10 24	.38 91	300 1900	.16 38	.61 144	200 1260
Flat Fan	.05 5	.19 18.9	260 4300	.10 10	.38 38	220 2500	.16 15.8	.61 60	190 1400
Full Cone	.10 12	.38 45	1140 4300	.19 23	.72 87	850 2800	.30 35	1.1 132	500 1720

Based on a sampling of nozzles selected to show the wide range of possible drop sizes available.

RELATIVE DROP SIZE

General drop size categories are used throughout this catalog. Actual drop size will vary based on flow rate and pressure, so for some nozzles, more than one drop size category is shown. If drop size is critical in your application, contact us for specific information.

IN MICRONS

FOG	LIGHT RAIN	MODERATE RAIN	INTENSE/HEAVY RAIN
10 to 100	100 to 500	500 to 1000	1000 to 5000
VERY SMALL	SMALL	MEDIUM	LARGE

DROP SIZE TERMINOLOGY

Terminology is often a major source of discrepancy and confusion in understanding drop size. To accurately compare drop sizes from one nozzle to another, the same diameters have to be used. Drop size is usually expressed in microns (micrometers). Following are the most popular characteristic diameters and their definitions.

$D_{V0.5}$: VOLUME MEDIAN DIAMETER (VMD)

A means of expressing drop size in terms of the volume of liquid sprayed. The Volume Median Diameter drop size when measured in terms of volume is a value where 50% of the total volume of liquid sprayed is made up of drops with diameters larger than the median value and 50% with smaller diameters.

$D_{V0.9}$

A value where 90% of the total volume of liquid sprayed is made up of drops with diameters smaller or equal to this value. This measurement is best suited when complete evaporation of the spray is required.

D_{32} : SAUTER MEAN DIAMETER (SMD)

A means of expressing the fineness of a spray in terms of the surface area produced by the spray. The Sauter Mean Diameter is the diameter of a drop having the same volume-to-surface area ratio as the total volume of all the drops to the total surface area of all the drops.

More drop size data is available on all types of spray nozzles. For more information contact your local Spraying Systems Co. sales engineer.

IMPACT

Impact, is the measure of force imparted on a surface by a spray pattern at a given distance. It can be expressed in several ways. All definitions are derived from the most basic equation of total impact force. This is the force that any flow, at any pressure, is capable of making on a surface. This does not account for orifice shape, nozzle type, fluid properties and other factors.

$$\mathbf{I = K \times Q \times \sqrt{P}}$$

Total theoretical impact = constant (based on units) x flow (at pressure P) x square root of pressure (P)

I = total theoretical spray impact

K = constant

Q = flow rate

P = liquid pressure

I	lbs.(f)	kg(f)	Newtons	Newtons
K	.0526	.024	.24	.745
Q	gpm	lpm	lpm	lpm
P	psi	kg/cm^2	bar	MPa

The constant (K), is a unit conversion based on the measurement system used. The conversions are listed in the chart above.

Example:

I = .0526 x 3.5 gpm x √150 psi

I = 2.25 lbs(f) is available for distribution throughout the pattern

Contact your local sales engineer for assistance in determining impact in your application.

OPERATING PRESSURE

The values given in the tabulation sections of this catalog indicate the most commonly used pressure ranges for the associated spray nozzle or accessory.

Contact your local Spraying Systems Co. sales engineer if your application requires pressure ranges beyond those stated in this catalog.

NOZZLE MATERIALS

For each nozzle there is a selection of "standard" materials that have been determined to meet the usual requirements of the applications most commonly associated with that type of nozzle. Standard materials include brass, steel, various stainless steels, hardened stainless steels, many plastics and various carbides. Spray nozzles can also be supplied in other materials upon special request including:

- AMPCO® 8
- CARPENTER® 20 (Alloy 20)
- Ceramics
- CUPRO® NICKEL
- Graphite
- HASTELLOY®
- INCONEL®
- MONEL®
- Nylon
- Polypropylene, PVC and CPVC
- REFRAX®
- Silicon carbide
- Stellite®
- Titanium
- Zirconium

NOZZLE WEAR

Nozzle wear is typically characterized by an increase in nozzle capacity, followed by a general deterioration of the spray pattern. Flat fan spray nozzles with elliptical orifices experience a narrowing of the spray pattern. In other spray pattern types, the distribution within the spray pattern deteriorates without substantially changing the coverage area. The increase in nozzle capacity can sometimes be recognized by a decrease in system operating pressure, particularly when using positive displacement pumps.

Materials having harder surfaces generally provide longer wear life. The chart below provides standard abrasion resistance ratios for different materials to help you determine if you should consider a different material for your nozzles, orifice inserts and/or spray tips.

Materials that offer better corrosion resistance are also available. However, the rate of chemical corrosion on specific nozzle materials is dependent on the solution being sprayed. The corrosive properties of the liquid being sprayed, its percent concentration and temperature, as well as the corrosion resistance of the nozzle material to the chemical must all be considered.

APPROXIMATE ABRASION RESISTANCE RATIOS

Spray Nozzle Material	Resistance Ratio
Aluminum	1
Brass	1
Polypropylene	1–2
Steel	1.5–2
MONEL	2–3
Stainless Steel	4–6
HASTELLOY	4–6
Hardened Stainless Steel	10–15
Stellite	10–15
Silicon Carbide (Nitride Bonded)	90–130
Ceramics	90–200
Carbides	180–250
Synthetic Ruby or Sapphire	600–2000

See Trademark Registration and Ownership, page i-1.

VISCOSITY

Absolute (dynamic) viscosity is the property of a liquid which resists change in the shape or arrangement of its elements during flow. Liquid viscosity is a primary factor affecting spray pattern formation and, to a lesser degree, capacity. High viscosity liquids – 100 cp or higher – require a higher minimum pressure to begin formation of a spray pattern and provide narrower spray angles as compared to those of water.

TEMPERATURE

The values given in this catalog are based on spraying water at 70°F (21°C). Although liquid temperature changes do not affect the spray performance of a nozzle, they often affect viscosity, surface tension and specific gravity which do influence spray nozzle performance.

SURFACE TENSION

The surface of a liquid tends to assume the smallest possible size; acting, in this respect, like a membrane under tension. Any portion of the liquid surface exerts a tension upon adjacent portions or upon other objects with which it is in contact. This force is in the plane of the surface and its amount per unit of length is surface tension. Its value for water is about 73 dynes per cm at 70°F (21°C). The main effects of surface tension are on minimum operating pressure, spray angle and drop size.

The property of surface tension is more apparent at low operating pressures. A higher surface tension reduces the spray angle, particularly on hollow cone and flat fan spray nozzles. Low surface tensions can allow a nozzle to be operated at a lower pressure.

SUMMARY OF SPRAY PERFORMANCE CONSIDERATIONS

The factors below can affect a spray nozzle's performance, and the effects can vary based on nozzle type and size. In some applications, there are interrelated factors which may counteract certain effects. For instance, in the case of a hollow cone spray nozzle, increasing the temperature of the liquid decreases the specific gravity, thereby producing a greater flow rate while at the same time decreasing the viscosity which reduces the flow.

Nozzle Characteristics	Increase in Operating Pressure	Increase in Specific Gravity	Increase in Viscosity	Increase in Fluid Temperature	Increase in Surface Tension
Pattern Quality	Improves	Negligible	Deteriorates	Improves	Negligible
Drop Size	Decreases	Negligible	Increases	Decreases	Increases
Spray Angle	Increases then decreases	Negligible	Decreases	Increases	Decreases
Capacity	Increases	Decreases	Full/hollow cone – increases Flat – decreases	Depends on fluid sprayed and nozzle used	No effect
Impact	Increases	Negligible	Decreases	Increases	Negligible
Velocity	Increases	Decreases	Decreases	Increases	Negligible
Wear	Increases	Negligible	Decreases	Depends on fluid sprayed and nozzle used	No effect

ESTIMATING PRESSURE DROPS THROUGH FLUIDLINE ACCESSORIES

The rated capacities listed in this catalog for valves, strainers and fittings typically correspond to pressure drops of approximately 5% of their maximum operating pressure.

Visit spray.com/sprayware for an online pressure drop calculator. Or contact your local sales engineer.

APPROXIMATE FRICTION LOSS IN PIPE FITTINGS IN EQUIVALENT FEET (METERS) OF STRAIGHT PIPE

Use the chart below to determine the equivalent length of pipe through fittings to equate the friction loss.

Pipe Size Standard Wt. (in.)	Actual Inside Dia. in. (mm)	Gate Valve FULL OPEN ft. (m)	Globe Valve FULL OPEN ft. (m)	45° Elbow ft. (m)	Run of Standard Tee ft. (m)	Standard Elbow or Run of Tee Reduced 1/2 ft. (m)	Standard Tee Through Side Outlet ft. (m)

2000															1.0	.26	7500														.23	.06

Recommended capacity range for each size is shown in shaded areas.
For pipe lengths greater than 10 ft. (3 m), the pressure loss is proportional to the length. For 50 ft. (15 m) of pipe, the pressure drop is approximately 5 times the value in the table.

MAINTAINING SPRAY NOZZLES

Like any precision component, spray nozzles wear over time. Spray nozzle wear can be hard to detect. Small changes in performance can result in quality problems and wasted water, chemicals and electricity. The cost of using worn nozzles can be very significant – tens of thousands of dollars or more per year. Detecting nozzle wear in the early stages can prevent a significant profit drain.

USING NOZZLES THAT ARE SPRAYING JUST 15% OVER THE RATED CAPACITY*

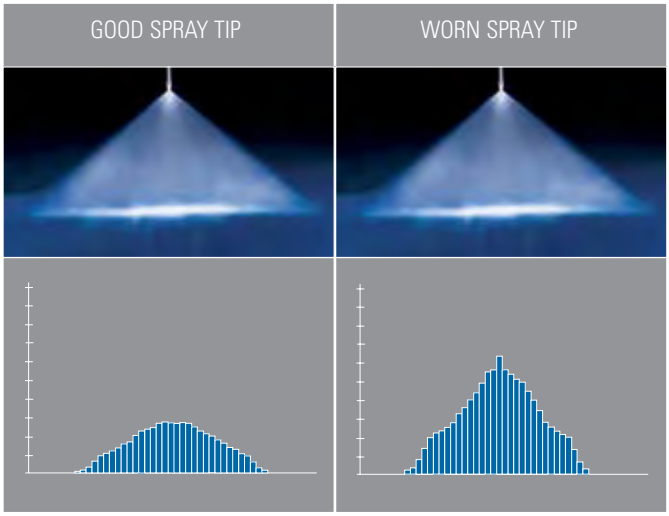
	WASTE	COST OF EXCESS
WATER	1,701,835 gallons (6,442,146 liters)	US $4,680
CHEMICALS	170,165 gallons (644,145 liters)	US $170,164
WASTEWATER DISPOSAL	1,872,000 gallons (7,086,291 liters)	US $7,956
TOTAL COST OF USING WORN NOZZLES:		**US $182,800**

*Based on total system flow of 100 gpm (379 lpm). Water cost of US $2.75/1000 gallons (3,785 liters). Chemical cost of US $1.00 per gallon (liter) and a dilution ratio of 10:1. System operates 2080 hours per year. Increased electricity cost, scrap and downtime due to quality problems are not included.

DETECTING WORN SPRAY NOZZLES

Visually inspecting nozzles is a start but unless wear is significant, it may not be detectable.

The graphic below illustrates this problem. The spray tip on the left is new and sprays properly. The spray tip on the right is worn and sprays 30% over capacity. The difference is undetectable by inspecting the nozzle, but spray collection data reveals the difference between the two tips.



WATCH FOR THESE SIGNS OF NOZZLE WEAR:

- **Quality control issues and increased scrap.** Check for uneven coating, cooling, drying or cleaning and changes in temperature, dust content and humidity
- **Flow rate change:**
  - For centrifugal pumps: monitor flow meter readings to detect increases or collect and measure the flow from the spray nozzle for a given period of time at a specific pressure and compare them to flow rate readings from new, unused spray nozzles
  - For positive displacement pumps: monitor the liquid line pressure for decreases; the flow rate will remain constant
- **Spray pressure in the nozzle manifold:**
  - For centrifugal pumps: monitor for increases in liquid volume sprayed. The spraying pressure is likely to remain the same
  - For positive displacement pumps: monitor pressure gauge for decreases in pressure and reduction in impact on sprayed surfaces. The liquid volume sprayed is likely to remain the same. Also, monitor for increases in pressure due to clogged spray nozzles
- **Deterioration of spray pattern quality.** Visually inspect the spray pattern for changes. Check the spray angle with a protractor. Measure the width of the spray pattern on the sprayed surface

REPLACING WORN NOZZLES

Inspecting and maintaining your nozzles on a regular basis will help identify wear and extend service life. However, wear will occur over time and the only solution is to replace your nozzles.

Here are a few guidelines to help you determine the optimal replacement interval:

- Are worn nozzles affecting product or process quality? If so, replace nozzles as soon as any wear is evident
- Is water conservation a priority? If so, replace nozzles as soon as wear is evident
- How much are you spending by continuing to use worn nozzles? How do the additional costs for water, chemicals, electricity and wastewater disposal compare with the cost of replacement nozzles?
- Is precise spray performance important to your overall process? If so, you may want to set pre-determined dates for nozzle replacement such as annual or semi-annual maintenance shutdowns

For more information on nozzle maintenance and replacement, visit spray.com. Or, contact your local sales engineer for assistance developing a nozzle maintenance program.

READ THE FOLLOWING INSTRUCTIONS:

WARNING:
All safety related and operating instructions should be read before the nozzle is operated. Follow all operating instructions. Failure to do so could result in serious or fatal injury.

WARNING:
It is important to recognize proper safety precautions when using a pressurized spray system. Fluids under pressure can penetrate skin and cause severe injury. Seek medical attention immediately.

WARNING:
When dealing with pressure applications, the system pressure should never exceed the lowest rated component. Always know your system and all component capabilities, maximum pressures and flow rates.

WARNING:
Before performing any maintenance, make sure all liquid supply lines to the machine are shut off and/or disconnected and chemicals/fluids are drained and not pressurized.

WARNING:
The use of any chemicals requires careful control of all worker hygiene. Follow all MSDS or safety precautions provided by the manufacturer.

WARNING:
Spraying Systems Co. does not manufacture or supply any of the chemicals used with our nozzles and is not responsible for their effects. Because of the large number of chemicals that could be used and their different chemical reactions, the buyer and user of this equipment should determine compatibility of the materials used and any of the potential hazards involved.

WARNING:
Spraying Systems Co. strongly recommends the use of appropriate safety equipment when working with potentially hazardous chemicals.

This equipment includes but is not limited to:

- Protective hat
- Safety glasses or face shield
- Chemical-resistant gloves and apron
- Long sleeve shirt and long pants

WARNING:
Before use, be sure appropriate connections are secure and made to withstand weight and reaction forces of the operating unit.

NOTE: Always remember to carefully read the chemical manufacturer's label and follow all directions.

WARNING:
It is important to operate equipment within the temperature range of all components. Also, insure appropriate time lapse or proper safety equipment is used when handling components after they're exposed to high temperatures.

WARNING:
Do not use any equipment outside the intended purposes of the product. Misuse can result in personal injury or product damage.

INTRODUCTION

CHOOSE FROM THE INDUSTRY'S LARGEST SELECTION

Styles:
- Conventional
- Quick-connect
- Maximum free passage

Spray patterns:
- Standard
- Wide angle
- Narrow angle
- Square
- Wide angle square
- Oval

Spray angles: 15° to 170°

Flow rate range: .05 to 8728 gpm (.19 to 32530 lpm)

Operating pressure range: up to 400 psi (25 bar)

Connections:
- 1/8" to 12" pipe sizes
- Female and male NPT and BSPT
- Flange

Materials:
- Brass
- Mild steel
- 303 stainless steel
- 316 stainless steel
- Polyvinyl chloride
- Hardened stainless steel
- Kynar®
- Polypropylene
- ProMax®
- PTFE
- Other specialty materials available

See Trademark Registration and Ownership, page i-1.

OPTIMIZE THE PERFORMANCE OF FULLJET® NOZZLES:

Prevent debris from damaging and clogging nozzles, valves and pumps by using strainers. **T-style strainers** are available in a wide range of sizes, materials and pressure ratings.
See page F4

Precisely position spray nozzles to ensure proper coverage of target and minimize overspray with **adjustable ball fittings**. Leak-proof, clog-resistant fittings are available in several sizes and styles.
See page F23

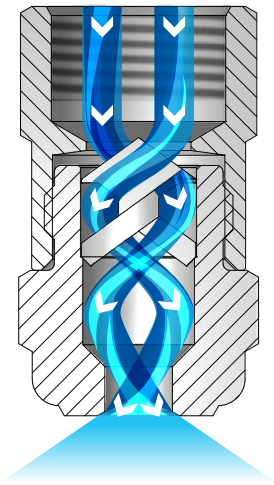
Use **split-eyelet connectors** to simplify and facilitate installation of nozzles, gauges, hoses and other fittings. Economical connectors eliminate cutting, threading and brazing.
See page F23

FULL CONE NOZZLES

TABLE OF CONTENTS

OVERVIEW: FULLJET G AND H

- Solid cone-shaped spray pattern with round impact area
- Unique vane design minimizes turbulence of the fluid to ensure uniform spray distribution and consistent spray coverage
- Large unobstructed flow passages minimize clogging and increase throughput
- Removable caps and vanes in most models make maintenance fast and easy
- Standard, wide and narrow spray angles



FullJet G and H Nozzles

The liquid enters the nozzle and proceeds through the vane. The vane causes the liquid to swirl. The design of the nozzle ensures the liquid continues to swirl as it enters the orifice. The liquid breaks up as it exits the nozzle orifice forming a well defined cone pattern. The drops are uniform in size and distributed equally throughout the spray pattern.

FULLJET G NOZZLES

- Spray angles: Standard – 43° to 94°, Narrow – 15° or 30°, Wide – 112° to 120°
- Uniform spray distribution from .07 to 25 gpm (.29 to 92 lpm)
- Operating pressures up to 300 psi (20 bar)
- Wall-mount versions for installation on room exterior, vessel or pipeline
- Right-angle mount versions for 90° angle mounting in areas with limited space

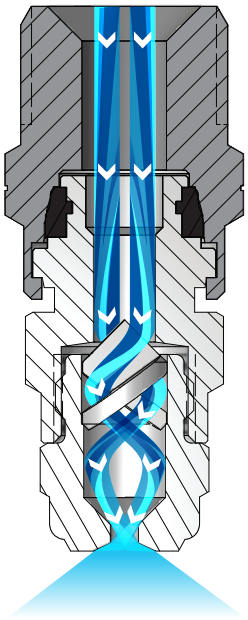
OVERVIEW: QUICK FULLJET AND PROMAX QUICK FULLJET

- Reduce maintenance time – bodies remain on pipe/header; quick quarter-turn removes/installs spray tips with automatic alignment
- Save on nozzle replacement costs – bodies can be reused, only spray tips are replaced
- Spray angles: Standard – 43° to 91°, Narrow – 15° or 30°, Wide – 102° to 120°
- Uniform spray distribution from .10 to 19.4 gpm (.38 to 72 lpm)
- Operating pressures up to 300 psi (20 bar)
- Choice of metal or ProMax materials. ProMax features:
  - ProMax material, a special grade of polypropylene, resists build-up and chemical attack; for use up to 150 psi (10 bar)
  - Internal O-ring provides a positive seal between the body and tip; seal remains attached to tip eliminating accidental loss
  - Optional external O-ring protects nozzle from contaminants
  - Tips are color-coded for easy flow rate identification



Quick FullJet and ProMax Quick FullJet Nozzles

The liquid enters the nozzle and proceeds through the vane. The vane causes the liquid to swirl. The design of the nozzle ensures the liquid continues to swirl as it enters the orifice. The liquid breaks up as it exits the nozzle orifice forming a well-defined cone pattern. The drops are uniform in size and distributed equally throughout the spray pattern.

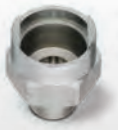
QUICK FULLJET OPTIONS

S W

QGA Spray Tip + QJA Body
1/8" to 1/2" female conn.
Removable cap and vane

QJLA Body
3/8" to 1/2" female conn.

QJJA Body
1/8" to 1/2" male conn.



QJJLA Body
3/8" to 1/2" male conn.

S W

QLGA Spray Tip
Removable cap and vane/ Large conn.
Use with QJLA and QJJLA bodies

S W

QHA Spray Tip
Non-removable vane
Use with QJA and QJJA bodies

S W

QLHA Spray Tip
Non-removable vane/ Large conn.
Use with QJLA and QJJLA bodies

N

QGA-15 Spray Tip
Removable cap and vane
Use with QJA and QJJA bodies

N

QLGA-15 Spray Tip
Removable cap and vane/ Large conn.
Use with QJLA and QJJLA bodies

N

QGA-30 Spray Tip
Removable cap and vane
Use with QJA and QJJA bodies

N

QLGA-30 Spray Tip
Removable cap and vane/ Large conn.
Use with QJLA and QJJLA bodies

PROMAX QUICK FULLJET OPTIONS

QPHA Spray Tip + QPPA Body
1/8" to 1/2" male conn.
Optional external O-ring

QPHA Spray Tip – Brown
QPHA-1 .1 gpm (.38 lpm)
Use with QPPA body

QPHA Spray Tip – White
QPHA-1.5 .15 gpm (.57 lpm)
QPHA-2.8W .28 gpm (1.1 lpm)
Use with QPPA body

QPHA Spray Tip – Gray
QPHA-2 .2 gpm (.76 lpm)
Use with QPPA body

QPHA Spray Tip – Black
QPHA-3 .3 gpm (1.1 lpm)
QPHA-4.3W .43 gpm (1.6 lpm)
Use with QPPA body

QPHA Spray Tip – Orange
QPHA-3.5 .35 gpm (1.3 lpm)
QPHA-5.6W .56 gpm (2.1 lpm)
Use with QPPA body

QPHA Spray Tip – Green
QPHA-5 .5 gpm (1.9 lpm)
QPHA-8W .8 gpm (3.1 lpm)
Use with QPPA body

QPHA Spray Tip – Yellow
QPHA-6.5 .65 gpm (2.5 lpm)
QPHA-10W 1.0 gpm (3.8 lpm)
Use with QPPA body

QPHA Spray Tip – Beige
QPHA-8 .8 gpm (3.1 lpm)
Use with QPPA body

QPHA Spray Tip – Blue
QPHA-10 1.0 gpm (3.8 lpm)
QPHA-12W 1.2 gpm (4.6 lpm)
Use with QPPA body

QPHA Spray Tip – Red
QPHA-15 1.5 gpm (5.7 lpm)
QPHA-14W 1.4 gpm (5.3 lpm)
Use with QPPA body

Capacities at 10 psi (0.7 bar).

ORDERING INFORMATION

METAL QUICK FULLJET

NOZZLE BODY				SPRAY TIP			
Inlet Conn.	Body Type	– Material Code	+	Tip Type	– Material Code	Capacity Size	

Example: 1/4 QJA – SS + QHA – SS 10

BSPT connections require the addition of a "B" prior to the inlet connection.

PROMAX QUICK FULLJET

NOZZLE BODY			SPRAY TIP		
Inlet Conn.	Body Type	+	Tip Type	–	Capacity Size

Example: 3/8 QPPA + QPHA – 3

Optional external O-ring for ProMax Quick FullJet nozzle: CP7717-2/17-VI

BSPT connections require the addition of a "B" prior to the inlet connection.

RELATIVE DROP SIZE IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
QJA and QJLA bodies	F	1/8 to 1/2	Brass, 303 stainless steel (SS)	–	B19
QJJA and QJJLA bodies	M	1/8 to 1/2		–	
QGA, QLGA, QHA and QLHA spray tips	NA	NA		B17	
QPPA body	M	1/4 to 3/8	ProMax	–	
QPHA spray tips	NA	NA		B17	
QGA-W, QLGA-W, QHA-W and QLHA-W spray tips	NA	NA	Brass, 303 stainless steel (SS)	B18	
QPHA-W spray tips	NA	NA	ProMax		
QGA-15, QLGA-15, QGA-30 and QLGA-30 spray tips	NA	NA	Brass, 303 stainless steel (SS)		

F = female thread; M = male thread. NA = not applicable. There is no material code for brass. Leave material code blank when ordering. For ProMax, the material code is built into part number. Other materials available upon request.

Brass Quick FullJet nozzles have Buna-N seal. Stainless steel FullJet nozzles have a Viton® seal.

For more dimensions and sizes, contact your sales engineer.

PROMAX QUICKJET NOZZLE MAXIMUM PRESSURES AT VARIOUS TEMPERATURES

The recommended maximum operating pressure for ProMax QuickJet nozzles varies based on temperature. As temperature increases, the recommended operating pressure decreases. Do not use outside of operating range.

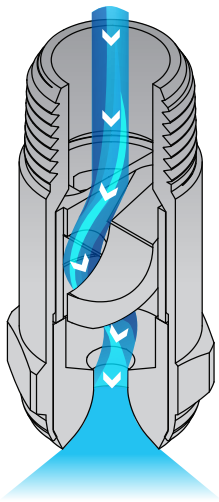
OVERVIEW: FULLJET MAXIMUM FREE PASSAGE (MFP)

- Solid cone-shaped spray pattern
- Patented vane design provides largest free passage of maximum free passage nozzles; ideal for use with fluids with particulates
- More uniform spray distribution than other large free passage nozzles
- Uniform spray distribution from 1.4 to 57 gpm (5.3 to 216 lpm)
- Operating pressures up to 80 psi (6 bar)
- Spray angles: 60°, 90° and 115°



MFP FullJet Nozzles

The liquid comes in contact with the vane as it enters the nozzle. The unique vane design stabilizes the fluid before it enters the swirl region. The swirling liquid passes through the nozzle and breaks up as it exits the nozzle orifice. The spray pattern produced is a well-defined cone shape consisting of uniform drops equally distributed throughout the spray pattern. The large, open passages in the nozzle minimize clogging.

PATENTED VANE TECHNOLOGY

PROVIDES SUPERIOR PERFORMANCE

PLUS NEW SIZES AND CAPACITIES NOW AVAILABLE

FULLJET MAXIMUM FREE PASSAGE (MFP) OPTIONS

HMFP
3/8" to 1-1/2" female conn.

HMFP
2" to 3" female conn.

HHMFP
3/8" to 1-1/2" male conn.

HHMFP
2" to 3" male conn.

ORDERING INFORMATION

FULLJET MAXIMUM FREE PASSAGE (MFP)

Inlet Conn.	Nozzle Type	–	Material Code	Spray Angle	Capacity Size

Example: **3/4** **HHMFP** – **SS** **90** **70**

BSPT connections require the addition of a "B" prior to the inlet connection.
Use material code SS for 316 stainless steel MFP nozzles.

RELATIVE DROP SIZE IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

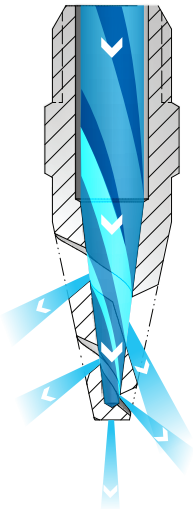
OVERVIEW: SPIRALJET

- Solid cone-shaped spray pattern
- Open passages ideal for use with fluids with particulates
- Maximum liquid throughput for a given pipe size
- Spray angles from 60° to 170°
- Uniform spray distribution from .7 to 3320 gpm (2.7 to 11967 lpm)
- Operating pressures up to 400 psi (25 bar)
- Compact size enables easy installation or retrofit on most pipe systems
- Certain nozzles available with UL listing for fire protection applications

For other certifications, contact your sales engineer.



SpiralJet HHSJ and HHSJX Nozzles

The liquid enters the nozzle and passes through the orifice. The liquid exits the nozzle through the voids in the spiral. As it deflects off the spiral surface, a full cone pattern is formed.

SPIRALJET OPTIONS

S

HHSJ
1/4" to 2" male conn.
Hex. body style/316 stainless steel

Other body styles, connection sizes and materials available. See Quick Reference Guide.

S

HHSJX
3/8" to 2" male conn.
Extra large free passage design
Hex. body style/brass

Other body styles, connection sizes and materials available. See Quick Reference Guide.

OVERVIEW: DISTRIBOJET EXTRA LARGE FREE PASSAGE

- Solid cone-shaped spray pattern with round impact area
- Extra large flow passages and large open orifice eliminate clogging
- Internal vane is cast as part of the nozzle
- Uniform spray distribution from 27 to 8728 gpm (122 to 32530 lpm)
- Operating pressures up to 60 psi (4 bar); full cone pattern develops at 1 psi (.07 bar)
- 50°, 60°, 80° and 95° spray angles; 50° and 65° styles feature specially designed grooved orifices for accurate flow rates and spray angle control

DistriboJet R, RF and RR Nozzles

The liquid comes in contact with the vane cast inside the nozzle as it enters. This contact causes the liquid to swirl. As the liquid flows through the extra large flow passages, the liquid continues to swirl. The liquid breaks up as it exits the large open orifice producing a deluge-like cone pattern.

DISTRIBOJET EXTRA LARGE FREE PASSAGE OPTIONS

S

R
2" to 8" female conn.

S

RF
4" to 12" flange conn.

S

RR
2" to 8" male conn.

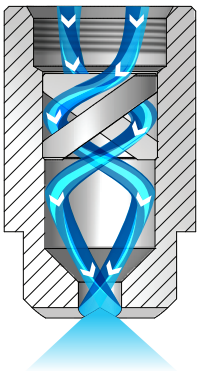
OVERVIEW: FULLJET SQUARE AND OVAL SPRAY PATTERNS AND VANELESS DESIGN

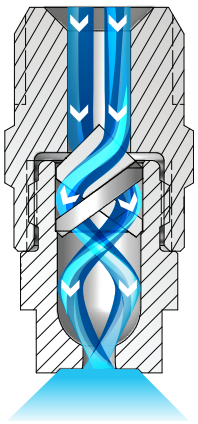
FullJet G and H Square Spray Nozzles



Square spray

As the liquid enters the nozzle, it flows over and through the vane. This creates the initial swirling of the liquid. The design of the nozzle ensures the liquid continues to swirl after passing through the vane. As the liquid exits the orifice, it interacts with cross cuts located on the face of the nozzle and forms a square spray pattern.

FullJet G-VL and GG-VL Nozzles



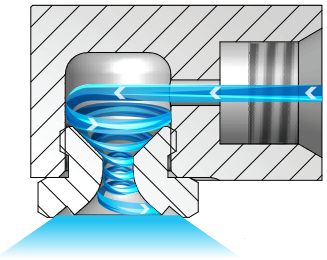
Oval spray

As the liquid enters the nozzle, it flows over and through the vane. This creates the initial swirling of the liquid. The design of the nozzle ensures the liquid continues to swirl after passing through the vane. The exit orifice of the nozzle has an oval shape. The liquid follows the oval shape as it exits the nozzle.

FullJet GANV and GGANV Nozzles

Vaneless spray

The liquid begins to swirl as it enters the swirlchamber. The swirling continues as it passes through the orifice. The breakup of the liquid occurs as it exits the nozzle orifice in a well-defined cone pattern.



FULLJET SQUARE SPRAY PATTERN

- Cone-shaped spray pattern with square-like impact area for coverage of rectangular areas or spray zones
- Unique vane design and large flow passages provide superior spray pattern control
- Uniform spray distribution from .26 to 1977 gpm (1.1 to 7371 lpm)
- Operating pressures up to 150 psi (10 bar)
- Spray angles: Standard – 43° to 94°, Wide – 112° to 120°

Removable vane/cast body

W

HH-WSQ – 1/4" to 1" male conn.
One-piece body

FULLJET OVAL SPRAY PATTERN

- Solid cone-shaped spray pattern with oval impact area; the width of the spray is approximately half its length
- Unique vane design provides superior spray pattern control
- Uniform spray distribution from .59 to 3.2 gpm (2.2 to 11.9 lpm)
- Operating pressures up to 150 psi (10 bar)
- Spray angles: Standard – 43° to 94°

G-VL – 3/8" female conn.
Removable cap and vane

GG-VL – 3/8" female conn.
Removable cap and vane

FULLJET VANELESS DESIGN

- Solid cone-shaped spray pattern with round impact area
- Uniform spray distribution from .35 to 23 gpm (1.4 to 87 lpm)
- Operating pressures up to 100 psi (7 bar)
- No vane for unrestricted flow – coarse spray is projected at 90° from axis at the inlet
- Spray angles: Standard – 43° to 94°

GANV – 1/4" to 1/2" female conn.
Vaneless design
Removable cap

GGANV – 1/4" to 1/2" male conn.
Vaneless design
Removable cap

ORDERING INFORMATION

FULLJET SQUARE SPRAY PATTERN

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: 1/4 G – SS 12SQ

BSPT connections require the addition of a "B" prior to the inlet connection.

FULLJET OVAL SPRAY PATTERN

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: 3/8 G – SS 4.9VL

BSPT connections require the addition of a "B" prior to the inlet connection.

FULLJET VANELESS DESIGN

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: 1/4 GANV – SS 10

BSPT connections require the addition of a "B" prior to the inlet connection.

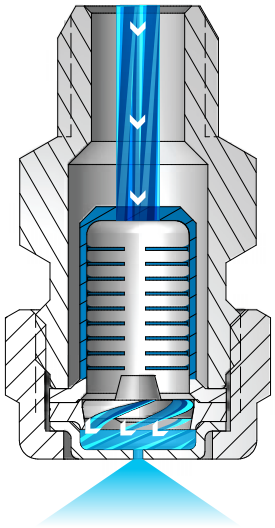
OVERVIEW: UNIJET

- Quick-connect nozzles reduce maintenance time – bodies remain on pipe/header
- Save on nozzle replacement costs – bodies can be reused, only spray tips are replaced; tips fit on male or female bodies
- Solid cone-shaped spray pattern with round impact area or cone-shaped spray pattern with square-like impact area for coverage of rectangular areas or spray zones
- Spray angles: Standard – 43° to 91°, Wide – 112° to 120°
- Uniform spray distribution from .08 to 7.4 gpm (.3 to 28 lpm)
- Operating pressures up to 300 psi (20 bar)

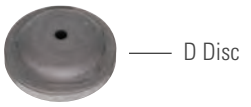


UniJet D and TG Nozzles

As the liquid enters the nozzle, it passes through an internal strainer and into the slotted core where the swirling begins. The swirling continues as the liquid passes through a disc. The breakup of the liquid occurs as it exits the orifice, producing a well-defined cone pattern. The drops are uniform in size and distributed equally throughout the spray pattern.

UNIJET OPTIONS

S



D Spray Tip + T Body
1/4" female conn.
Disc and core type
Use with slotted strainer and tip retainer

TT Body/Cap
1/8" to 1/2" male conn.

T Body/Cap
1/8" to 1/2" female conn.

S

TG Spray Tip
Use with T or TT bodies and tip retainer

W

TG-W Spray Tip
Use with T or TT bodies and tip retainer

S

TG-SQ Spray Tip
Use with T or TT bodies and tip retainer

W

TH-W Spray Tip
Tip and retainer in one
Use with T or TT bodies

ORDERING INFORMATION

UNIJET

NOZZLE BODY				SPRAY TIP			
Inlet Conn.	Body Type	– Material Code	+	Tip Type	– Material Code		Capacity Size

Example: 1/4 T – SS + TG – SS 10

UniJet nozzle assemblies include a pre-sized wire mesh based on orifice diameter.
When ordering just a UniJet spray tip, the mesh is not included.
See Accessories, page F6 for a mesh selection guide and ordering information.

BSPT connections require the addition of a "B" prior to the nozzle body inlet connection.

UNIJET – DISC AND CORE TYPE

NOZZLE BODY				ORIFICE DISC AND CORE			
Inlet Conn.	Body Type	– Material Code	+	Orifice Disc No.	– Core No.		Material Code

Example: 1/4 TT – SS + D4 – 35 HSS

UniJet nozzle assemblies include a pre-sized wire mesh based on orifice diameter.
When ordering just a UniJet spray tip, the mesh is not included.
See Accessories, page F6 for a mesh selection guide and ordering information.

BSPT connections require the addition of a "B" prior to the nozzle body inlet connection.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
T body	F	1/8 to 1/2	Brass, 303 stainless steel (SS)	–	B40
TT body	M			–	
D spray tip	NA	NA	303 stainless steel (SS), Hardened stainless steel (HSS)	B38	
TG spray tip	NA	NA	Brass, 303 stainless steel (SS)	B39	
TG-W and TH-W spray tips	NA	NA	Brass, 303 stainless steel (SS)	B39	
TG-SQ spray tip	NA	NA	Brass, 303 stainless steel (SS)	B40	

F = female thread; M = male thread; NA = not applicable. There is no material code for brass. Leave material code blank when ordering. Other materials available upon request.
For more dimensions and sizes, contact your sales engineer.

RELATIVE DROP SIZE IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

For nozzles using Orifice Disc Nos. 1, 1.5 and 2 or Core Nos. 31 and 33, Slotted Strainer No. 4514-20 equivalent to 25 mesh screen size is supplied. For all other larger capacity Discs and Cores, Slotted Strainer No. 4514-32 equivalent to 16 mesh screen size is supplied.

Other body sizes may be available. Contact your sales engineer for further information.

For additional information see Data Sheet 4498-1.

Highlighted column shows the rated pressure.

Maximum Free Passage Diameter is the maximum diameter as listed of foreign matter that can pass through the nozzle without clogging.

Other body sizes may be available. Contact your sales engineer for further information.

Highlighted column shows the rated pressure.

FLAT SPRAY NOZZLES

INTRODUCTION

MORE SIZES AND OPTIONS THAN ANY OTHER SUPPLIER

Styles:
- Conventional
- Quick-connect

Spray patterns:
- Standard
- Wide angle
- Narrow angle

Spray angles: 0° (solid stream) to 170°

Flow rate range: .003 to 1237 gpm (.013 to 4720 lpm)

Operating pressure range: up to 4000 psi (275 bar)

Connections:
- 1/8" to 2" pipe sizes
- Female and male NPT and BSPT

Materials:
- Brass
- Mild steel
- 303 stainless steel
- 316 stainless steel
- 400 series stainless steel
- Polyvinyl chloride
- Hardened stainless steel
- ProMax®
- Other specialty materials available

See Trademark Registration and Ownership, page i-1.

OPTIMIZE THE PERFORMANCE OF VEEJET® NOZZLES:

Accurately control spray line pressure with piston-type **pressure relief valves**. Minimize liquid waste caused by excessive pressure by bypassing excess liquid back to the liquid source or pump inlet.
See page F31

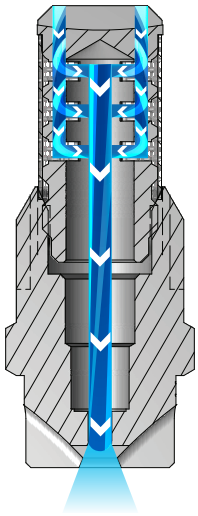
Use **adjustable ball fittings** for quick positioning of spray tips. Tips can be adjusted within a 50° included angle. Locking screws maintain nozzle position even when jarred or subject to vibration.
See page F23

Minimize clogging in UniJet® nozzles by trapping larger particles and preventing debris from entering the orifice by using **strainers**. Available in a wide range of materials and mesh sizes.
See page F16

FLAT SPRAY NOZZLES
TABLE OF CONTENTS

OVERVIEW: VEEJET H AND U

- Flat spray nozzles are ideal for use in spray headers or manifolds. They produce a fan-type, tapered-edge spray pattern to ensure even coverage when multiple nozzles are used in a series
- Solid stream (0° spray angle) available to achieve highest impact of any nozzle type
- Consistent performance over the industry's largest range of flow rates and pressures
- Some models feature an integral strainer
- High pressure/high impact versions available
- Quick-connect versions available to speed maintenance and installation

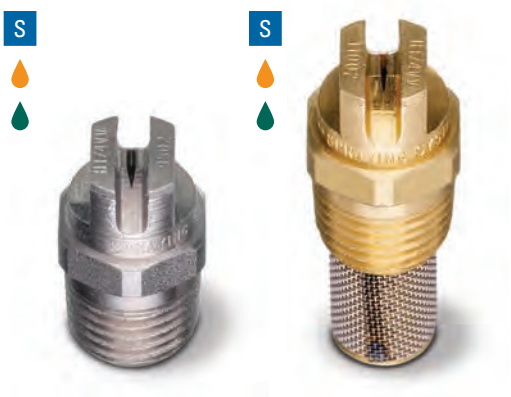


VeeJet H and U Nozzles
As the liquid exits through the sharp V shape cut of the orifice, it forms into a flat spray pattern. The distribution is tapered from the center of the spray.

VEEJET H AND U NOZZLES

- Flat fan type, tapered edge spray pattern
- One-piece design
- Spray angles from 0° to 110°
- Uniform spray distribution with flow rates from .012 to 1237 gpm (.047 to 4720 lpm)
- Operating pressures up to 500 psi (35 bar)

H-U
1/8" to 3/4" male conn.
Flow rates of 1 gpm and greater at 40 psi
(3.8 lpm and greater at 2.8 bar)



H-VV and H-VVL
1/8" to 1/4" male conn.
Flow rates below 1 gpm at 40 psi
(3.8 lpm at 2.8 bar)
H-VVL includes integral strainer

VEEJET H AND U OPTIONS

H-DT
1/8" to 1/4" female conn.
Flow rates below 1 gpm at 40 psi
(3.8 lpm at 2.8 bar)

H-DU
1/8" to 1/4" female conn.
Flow rates of 1 gpm and greater at 40 psi
(3.8 lpm and greater at 2.8 bar)

U
1" to 2" male conn.
Flow rates of 40 gpm and greater at 40 psi
(151 lpm and greater at 2.8 bar)

RELATIVE DROP SIZE
IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

ORDERING INFORMATION

VEEJET H-DT, H-DU, H-U, H-VV AND H-VVL

Nozzle Prefix	Inlet Conn.	Nozzle Type	–	Material Code	Spray Angle	Capacity Size

Example

H	1/4	VV	–	SS	110	10

BSPT connections require the addition of a "B" prior to the inlet connection.

VEEJET U

Inlet Conn.	Nozzle Type	–	Material Code	Spray Angle	Capacity Size

Example

1	U	–	SS	50	500

BSPT connections require the addition of a "B" prior to the inlet connection.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
H-DT	F	1/8 to 1/4	Brass, 303 stainless steel (SS)	C6–C8	C13
H-DU	F	1/8 to 1/4	Brass, 303 stainless steel (SS), Polyvinyl chloride (PVC)	C9–C13	
H-U	M	1/8 to 3/4	Brass, Mild steel (I), 303 stainless steel (SS), 316 stainless steel (316SS), Polyvinyl chloride (PVC)	C9–C13	
H-VV	M	1/8 to 1/4	Brass, Mild steel (I), 303 stainless steel (SS), 316 stainless steel (316SS)	C6–C8	
H-VVL	M	1/8 to 1/4	Brass, 303 stainless steel (SS), 316 stainless steel (316SS)	C6–C8	
U	M	1 to 2	Brass, Mild steel (I), 303 stainless steel (SS)	C9–C13	

F = female thread; M = male thread. There is no material code for brass. Leave material code blank when ordering. Other materials available upon request.
For more dimensions and sizes, contact your sales engineer.

Based on the largest/heaviest version of each type.

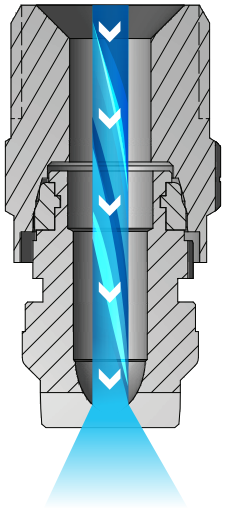
OVERVIEW: QUICK VEEJET AND PROMAX QUICK VEEJET

- Ideal for high-maintenance operations – bodies remain on pipe/header; quick quarter-turn removes/installs spray tips in seconds
- Automatic alignment feature saves time
- Miniature versions are ideal when smaller physical size and lower weight are important
- Flat fan type, tapered edge spray pattern
- Spray angles from 0° to 110°
- Uniform spray distribution with flow rates from .035 to 68 gpm (.14 to 255 lpm)
- Operating pressures up to 300 psi (20 bar)
- Choice of metal or ProMax. ProMax features:
  - ProMax material, a special grade of polypropylene, resists build-up and chemical attack; for use up to 150 psi (10 bar)
  - Internal O-ring provides a positive seal between the body and tip; seal remains attached to tip eliminating accidental loss
  - Optional external O-ring protects nozzle from contaminants
  - Tips are color-coded for easy flow rate identification



Quick VeeJet and ProMax Quick VeeJet Nozzles
As the liquid exits through the sharp V shape cut of the orifice, it forms into a flat spray pattern. The distribution is tapered from the center of the spray.

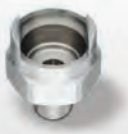
QUICK VEEJET AND MINIATURE QUICK VEEJET OPTIONS

S

QLUA Spray Tip + QJJLA Body
3/8" to 1/2" male conn.

QJLA Body
3/8" to 1/2" female conn.

QJA Body
1/8" to 1/2" female conn.



QJJA Body
1/8" to 1/2" male conn.

QJJS Body – Miniature version
1/8" to 1/4" male conn.

S

QUA Spray Tip
Flow rates of 1 to 8 gpm at 40 psi
(3.9 to 32 lpm at 2.8 bar)
Use with QJA or QJJA bodies

S

QVVA Spray Tip
Flow rates below 1 gpm at 40 psi
(3.9 lpm at 2.8 bar)
Use with QJA or QJJA bodies

S

QSVV Spray Tip – Miniature version
Flow rates below 1 gpm at 40 psi
(3.9 lpm at 2.8 bar)
Use with QJJS body

PROMAX QUICK VEEJET AND PROMAX MINIATURE QUICK VEEJET OPTIONS

QPTA Spray Tip + QPPA Body
1/4" to 3/8" male conn.
Optional external O-ring

QMVV Miniature Spray Tip + QPPM Miniature Body
1/8" to 1/4" male conn.
Options: body strainer, tip strainer and external O-ring

QPTA Spray Tip – White
1.0 gpm (3.9 lpm)
Use with QPPA body

QPTA Spray Tip – Grey
1.5 gpm (5.9 lpm)
Use with QPPA body

QMVV Spray Tip – White
.10 gpm (.38 lpm)
Use with QPPM body

QMVV Spray Tip – Red
.15 gpm (.59 lpm)
Use with QPPM body

QPTA Spray Tip – Black
2.0 gpm (7.9 lpm)
Use with QPPA body

QPTA Spray Tip – Orange
3.0 gpm (11.8 lpm)
Use with QPPA body

QMVV Spray Tip – Gray
.20 gpm (.79 lpm)
Use with QPPM body

QMVV Spray Tip – Black
.30 gpm (1.2 lpm)
Use with QPPM body

QPTA Spray Tip – Green
4.0 gpm (15.8 lpm)
Use with QPPA body

QPTA Spray Tip – Yellow
5.0 gpm (19.7 lpm)
Use with QPPA body

QMVV Spray Tip – Orange
.40 gpm (1.6 lpm)
Use with QPPM body

QMVV Spray Tip – Green
.50 gpm (2.0 lpm)
Use with QPPM body

QPTA Spray Tip – Blue
6.0 gpm (24 lpm)
Use with QPPA body

QPTA Spray Tip – Red
7.0 gpm (28 lpm)
Use with QPPA body

QMVV Spray Tip – Yellow
.60 gpm (2.4 lpm)
Use with QPPM body

QMVV Spray Tip – Blue
.80 gpm (3.2 lpm)
Use with QPPM body

Capacities at 40 psi (2.8 bar).

RELATIVE DROP SIZE
IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

ORDERING INFORMATION

METAL QUICK VEEJET

NOZZLE BODY — SPRAY TIP

Inlet Conn.	Body Type	–	Material Code	+	Tip Type	–	Material Code	Spray Angle	Capacity Size

Example

1/4	QJJA	–	SS	+	QVVA	–	SS	110	10

BSPT connections require the addition of a "B" prior to the inlet connection.

PROMAX QUICK VEEJET

NOZZLE BODY — SPRAY TIP

Inlet Conn.	Body Type	+	Tip Type	Spray Angle	Capacity Size

Example

1/4	QPPM	+	QMVV	50	02

Options for miniature ProMax Quick VeeJet nozzles:
1/8" conn.: Kynar body strainer: CP39212-1-KY
1/4" conn.: Kynar body strainer: CP39212-2-KY
Kynar tip strainer: CP45095
External O-ring: CP7717-2/13-VI
Optional external O-ring for standard ProMax Quick VeeJet nozzle: CP7717-2/17-VI

BSPT connections require the addition of a "B" prior to the inlet connection.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
QJJS body	M	1/8 to 1/4	Brass, 303 stainless steel (SS)	–	C23
QSVV spray tip	NA	NA		C17–C22	
QJA and QJLA bodies	F	1/8 to 1/2		–	
QJJA and QJJLA bodies	M	1/8 to 1/2		–	
QLUA, QUA and QVVA spray tips	NA	NA		C17–C22	
QPPM body	M	1/8 to 1/4	ProMax	–	
QMVV spray tips	NA	NA		C17–C22	
QPPA body	M	1/8 to 1/2		–	
QPTA spray tips	NA	NA		C17–C22	

F = female thread; M = male thread; NA = not applicable. There is no material code for brass. Leave material code blank when ordering. For ProMax, the material code is built into part number. Other materials available upon request.

For more dimensions and sizes, contact your sales engineer.

See page B16 for maximum operating pressures for ProMax QuickJet nozzles at various temperatures.

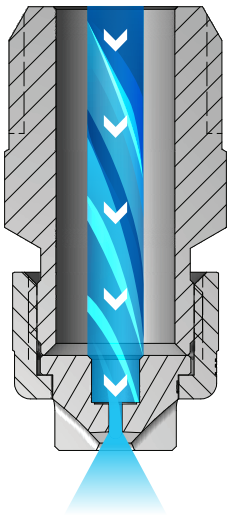
OVERVIEW: UNIJET

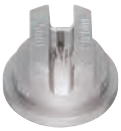
- A large choice of interchangeable spray tips, body types/sizes, materials, spray angles, flow rates and accessories allows use of different components in a single header to match performance to different operations
- Save on nozzle replacement costs – bodies can be reused, only spray tips are replaced
- Design allows easy tip change out in place – remove tips by unscrewing the retainer cap
- Recessed orifices to protect against damage
- Flat fan type, tapered edge spray pattern
- Spray angles from 0° to 110°
- Uniform spray distribution with flow rates from .003 to 25 gpm (.013 to 94 lpm)
- Operating pressures up to 500 psi (35 bar)



UniJet VeeJet® Nozzles
As the liquid exits through the sharp V shape cut of the orifice, it forms into a flat spray pattern. The distribution is tapered from the center of the spray.

UNIJET OPTIONS

S



TPU Spray Tip + T Body
Use with screen strainer and tip retainer

TT Body/Cap
1/8" to 1/2" male conn.

T Body/Cap
1/8" to 1/2" female conn.

S

13802 Spray Tip
Self-aligning tip
Wrench flats on top of tip
Straight alignment flats connection
Use with self-aligning T or TT bodies

RELATIVE DROP SIZE
IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

ORDERING INFORMATION

UNIJET

NOZZLE BODY + SPRAY TIP

Inlet Conn.	Body Type	–	Material Code	+	Spray Angle	Capacity Size	–	Material Code

Example: **1/4 TT – SS + U110 10 – SS**

BSPT connections require the addition of a "B" prior to the nozzle body inlet connection.

TIP ONLY

Tip Type	–	Spray Angle	Capacity Size	–	Material Code

Example: **TPU – 110 10 – SS**

UniJet nozzle assemblies include a pre-sized wire mesh based on orifice diameter.
When ordering just a UniJet spray tip, the mesh is not included.
See Accessories, page F6 for a mesh selection guide and ordering information.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
T body	F	1/8 to 1/2	Brass, 303 stainless steel (SS)	–	C31
TT body	M			–	
TPU spray tip	NA	NA	Brass, 303 stainless steel (SS)	C25–C31	
13802 spray tip	NA	NA	Brass, 303 stainless steel (SS), 316 stainless steel (316 SS)	C25–C31	

F = female thread; M = male thread; NA = not applicable. There is no material code for brass. Leave material code blank when ordering. Other materials available upon request.
For more dimensions and sizes, contact your sales engineer.

Nozzle	Nozzle Type	Inlet Conn. (in.)	L (in.)	Hex. (in.)	Net Weight (oz.)
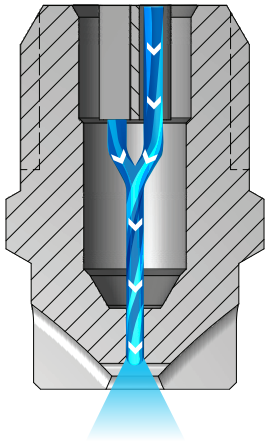
	**T (F) + 13802 TT (M) + 13802**	1/4	1.891	13/16	2.3

Based on the largest/heaviest version of each type.

OVERVIEW: WASHJET

- High-impact sprays and high pressure operation ensure optimal cleaning – ideal for pressure washing
- Long wear life – 400 series stainless steel material
- Flat spray nozzles provide an even edge fan type spray pattern
- Uniform spray distribution from .27 to 78 gpm (1.0 to 290 lpm) by using optional internal guide vane to stabilize liquid turbulence
- Spray angles from 0° (solid stream) to 65° for MEG, WEG and MEG-SSTC; 0° to 80° for IMEG
- Operating pressures from 300 to 4000 psi (20 to 275 bar)
- MEG-SSTC nozzles have tungsten carbide orifice inserts for maximum erosion resistance
- IMEG® versions are ideal for critical, demanding operations Features:
  - Patented design that optimizes fluid dynamics by minimizing turbulence
  - Higher impact per unit area than MEG nozzles



WashJet Nozzles
As the liquid exits through the rounded U shape of the orifice, it forms into a flat spray pattern. The distribution is even at pressures above 300 psi (20 bar).

WASHJET OPTIONS

MEG
1/8" to 1/4" male conn.

WEG
1/8" to 1/4" female conn.

MEG-SSTC
1/4" male conn.

IMEG
1/8" to 1/4" male conn.

ORDERING INFORMATION

WASHJET MEG, WEG, MEG-SSTC AND IMEG WITH GUIDE VANE

Inlet Conn.	Nozzle Type	–	Spray Angle	Capacity Size

Example: 1/4 MEG – 15 04

BSPT connections require the addition of a "B" prior to the inlet connection.

WASHJET MEG, WEG, MEG-SSTC AND IMEG WITHOUT GUIDE VANE

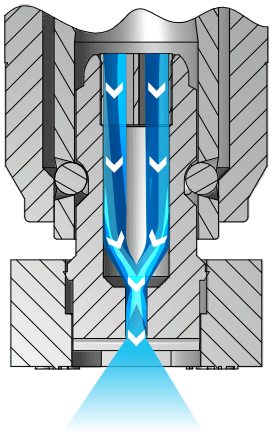
Inlet Conn.	Nozzle Type	–	Spray Angle	Capacity Size

Example: 1/4 SAMEG – 15 04

BSPT connections require the addition of a "B" prior to the inlet connection.

OVERVIEW: QUICK-CONNECT WASHJET

- QCMEG and QCIMEG fit in Parker® ST fitting or equivalent
- Color-coded nozzle guards for easy spray angle identification
- Locating ribs on nozzle guards for fast alignment and easy spray pattern direction
- High impact sprays and high pressure operation ensure effective cleaning
- Long wear life – 400 series stainless steel material
- Uniform spray distribution from .55 to 15 gpm (2.0 to 57 lpm) by using optional internal guide vane to stabilize liquid turbulence
- Spray angles from 0° (solid stream) to 40°
- QCIMEG versions are ideal for critical, demanding operations. Features:
  - Patented design that optimizes fluid dynamics by minimizing turbulence
  - Higher impact per unit area than QCMEG nozzles



Quick-Connect WashJet Nozzles
As the liquid exits through the rounded U shape of the orifice, it forms into a flat spray pattern. The distribution is even at pressures above 300 psi (20 bar).

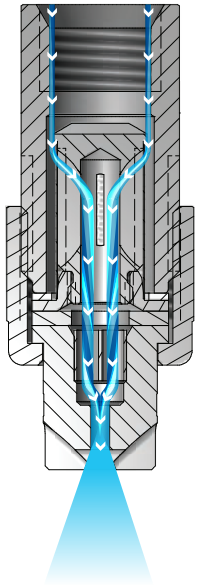
OVERVIEW: UNIJET HIGH PRESSURE SPRAY NOZZLE

- Designed for operations requiring higher impact
- Save on nozzle replacement costs – bodies can be reused, only spray tips are replaced
- Design allows easy tip change out – remove tips by unscrewing the retainer cap
- Flat spray nozzles provide an even edge fan type spray pattern
- Spray angles from 0° to 65°
- Uniform spray distribution across the entire spray pattern and flow rates from .41 to 17.3 gpm (1.5 to 64 lpm)
- Operating pressures from 300 to 3000 psi (20 to 200 bar) – higher than standard tips
- Body assembly consists of high pressure nozzle body, strainer, tip gasket and high pressure tip retainer



UniJet High Pressure Nozzles

As the liquid exits through the rounded U shape of the orifice, it forms into a flat spray pattern. The distribution is even at pressures above 300 psi (20 bar).

UNIJET HIGH PRESSURE SPRAY NOZZLE

S

EG Spray Tip + 11430 Assembly

Use with gasket, screen strainer, tip gasket and high pressure tip retainer

ORDERING INFORMATION

UNIJET HIGH PRESSURE

NOZZLE BODY					SPRAY TIP			
Assembly Type	– Inlet Conn.	– Material Code	– Strainer Screen Mesh Size	+ Tip Code	Spray Angle	Capacity Size	Tip Type

Example: **11430 – 1/4 – SS – 100 + TP 15 04 EG**

BSPT connections require the addition of a "B" prior to the nozzle body inlet connection.

RELATIVE DROP SIZE IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
11430 body assembly	F	1/4	303 stainless steel (SS)	–	C39
EG spray tip	NA	NA	Hardened stainless steel	C39	

F = female thread; NA = not applicable. No material code is required for hardened stainless steel. Leave material code blank when ordering.
For more dimensions and sizes, contact your sales engineer.

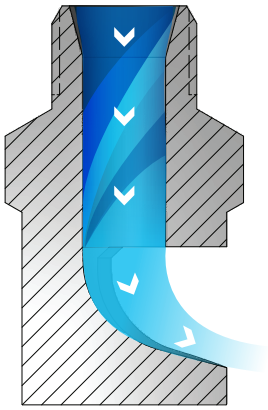
DIMENSIONS AND WEIGHTS

Nozzle	Nozzle Type	Inlet Conn. (in.)	L (in.)	Hex. (in.)	Net Weight (oz.)
	**11430 (F) + EG**	1/4	2.218	13/16	3.5

Based on the largest/heaviest version of each type.

OVERVIEW: FLOODJET

- Ideal for operations requiring wide coverage
- Wide angle, deflected type flat fan spray pattern
- Use when nozzles can be mounted horizontally
- Orifice is protected from damage and is designed to minimize clogging
- Spray angles from 73° to 153°
- Uniform spray distribution from .04 to 110 gpm (.14 to 410 lpm)
- Operating pressures up to 60 psi (4 bar)
- TEK provides a tapered edge spray pattern to eliminate heavy edges while maintaining the wide spray pattern



FloodJet Nozzles

As liquid passes through the nozzle, it hits the deflector surface and spreads out to form a flat spray pattern. The distribution is even from the center of the spray. The deflector surface enables the formation of very wide spray angles compared to other flat spray nozzles.

FLOODJET OPTIONS

W

K
1/8" to 1" male conn.

W

TEK
1/8" to 1/4" male conn.

ORDERING INFORMATION

FLOODJET K

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: **1/8** **K** – **SS** **2**

BSPT connections require the addition of a "B" prior to the inlet connection.

FLOODJET TEK

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: **1/8** **TEK** – **SS** **2**

BSPT connections require the addition of a "B" prior to the inlet connection.

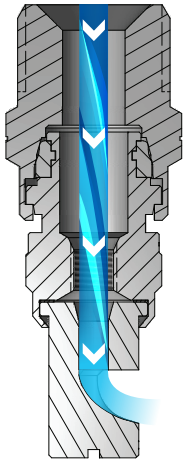
RELATIVE DROP SIZE
IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

OVERVIEW: QUICK FLOODJET

- Ideal for high-maintenance operations – bodies remain on pipe/header; quick quarter-turn removes/installs spray tips in seconds
- Automatic alignment feature saves time
- Miniature versions are ideal when smaller physical size and lower weight are required
- Wide angle, deflected type flat fan spray pattern
- Spray angles from 73° to 153°
- Uniform spray distribution with flow rates from .01 to 14.7 gpm (.037 to 55 lpm)
- Operating pressures up to 60 psi (4 bar)



Quick FloodJet Nozzles
As liquid passes through the nozzle, it hits the deflector surface and spreads out to form a flat spray pattern. The distribution is even from the center of the spray. The deflector surface enables the formation of very wide spray angles compared to other flat spray nozzles.

QUICK FLOODJET OPTIONS

W

QTKA Spray Tip + QJA Body
1/8" to 1/2" female conn.
Use with QJA or QJJA body

QJJA Body
1/8" to 1/2" male conn.

QJJS Body
Miniature version
1/8" to 1/4" male conn.

W

QSTK Spray Tip
Miniature version
Flow rates below 1 gpm at 40 psi (3.9 lpm at 2.8 bar)
Use with seal and QJJS body

ORDERING INFORMATION

QUICK FLOODJET

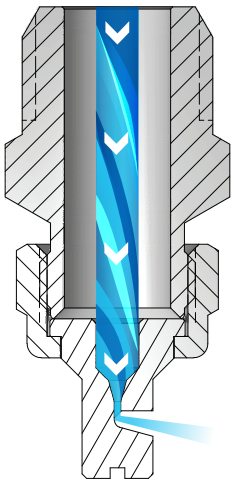
NOZZLE BODY				SPRAY TIP			
Inlet Conn.	Body Type	– Material Code	+	Tip Type	– Material Code	Capacity Size	

Example: 3/8 QJA – SS + QTKA – SS 1.5

BSPT connections require the addition of a "B" prior to the inlet connection.

OVERVIEW: UNIJET® FLOODJET

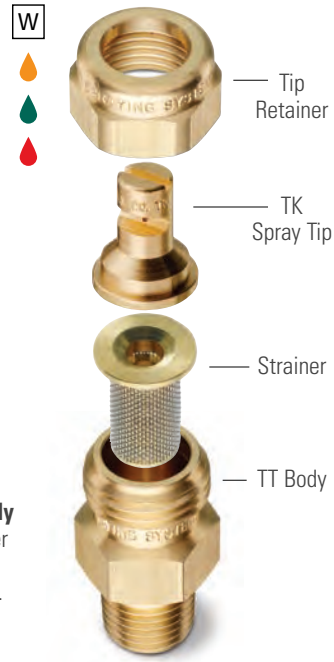
- A large choice of interchangeable spray tips, body types/sizes, materials, spray angles, flow rates and accessories allows use of different components in a single header to match performance to different operations
- Design allows easy tip change out in place – remove tips by unscrewing the retainer cap
- Wide angle, deflected type flat fan spray pattern
- Spray angles from 73° to 153°
- Uniform spray distribution with flow rates from .06 to 12.2 gpm (.28 to 46 lpm)
- Operating pressures up to 60 psi (4 bar)
- Assembly consists of nozzle body, strainer, spray tip and tip retainer



UniJet FloodJet Nozzles
As liquid passes through the nozzle, it hits the deflector surface and spreads out to form a flat spray pattern. The distribution is even from the center of the spray. The deflector surface enables the formation of very wide spray angles compared to other flat spray nozzles.

UNIJET FLOODJET OPTIONS

W



TK Spray Tip + TT Body
Use with screen strainer and tip retainer
1/8" to 1/2" male conn.

TT Body/Cap
1/8" to 1/2" male conn.

T Body/Cap
1/8" to 1/2" female conn.

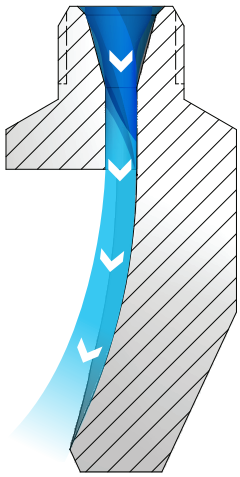
OVERVIEW: FLATJET

- Provides higher impact than other narrow angle nozzles
- Deflected type flat fan spray pattern
- Ideal for conveyor cleaning
- Spray angles from 15° to 50°
- Uniform spray distribution from .24 to 39 gpm (.91 to 144 lpm)
- Operating pressures up to 150 psi (10 bar)



FlatJet Nozzles
As liquid passes through the nozzle, it hits the deflector surface and spreads out to form a flat spray pattern. The distribution is even from the center of the spray. The combination of medium- to large-flow rates and narrow spray angles produce a high impact spray.

FLATJET OPTIONS

N

P
1/8" to 1/4" male conn.

N

P
3/8" to 3/4" male conn.

ORDERING INFORMATION

FLATJET P

Inlet Conn.	Nozzle Type	–	Material Code	Spray Angle	Capacity Size

Example

3/8	P	–	SS	50	60

BSPT connections require the addition of a "B" prior to the inlet connection.

RELATIVE DROP SIZE
IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
P	M	1/8 to 3/4	Brass, Mild steel (I), 303 stainless steel (SS), 316 stainless steel (316SS)	C48–C49	C48–C49

M = male thread. There is no material code for brass. Leave material code blank when ordering. Other materials available upon request.
For more dimensions and sizes, contact your sales engineer.

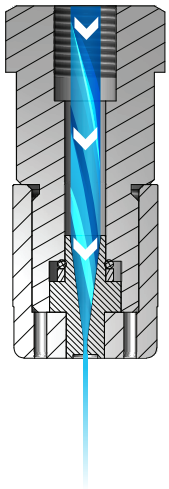
OVERVIEW: ULTRA-HIGH PRESSURE FS AND VS

- Ultra-high pressure, high impact flat spray or solid stream
- Operating pressures are up to 10 times higher than other high pressure nozzles – up to 60,000 psi (4000 bar)
- Traditional and quick-connect options;
  – Save on nozzle replacement costs – nozzle bodies can be reused – only spray tips are replaced
- Long wear life – nozzles are hardened stainless steel. Spray tips are available with extra hard sapphire inserts for maximum wear resistance
- Spray angles from 0° to 45°
- Uniform spray distribution from 0.03 to 78 gpm (0.11 to 295 lpm)
- Nozzle bodies include O-ring, gasket (58833 only) and tip retainer



Ultra-High Pressure Nozzles
As liquid passes through the engineered orifice, a very high impact spray pattern is produced in either zero degree (solid stream) or flat spray pattern.

FS AND VS OPTIONS

VS010 Spray Tip + 58834 Body
Operating pressure up to 20,000 psi (1400 bar)

VS625
1/4" male conn.
Operating pressure up to 17,500 psi (1200 bar)

VS940
1/16" male conn.
Operating pressure up to 15,000 psi (1000 bar)

58833 Body
3/8" to 1/2" male or female conn.

VS020 Spray Tip
Use with 58834 nozzle body
Operating pressure up to 30,000 psi (2000 bar)

VS051 Spray Tip
No threads*
Operating pressure up to 60,000 psi (4000 bar)

*Customer supplies holder

FS013 Spray Tip
Use with 58834 nozzle body
Operating pressure up to 30,000 psi (2000 bar)

FS020 Spray Tip
Use with 58833 nozzle body
Operating pressure up to 30,000 psi (2000 bar)

RELATIVE DROP SIZE IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

HOLLOW CONE NOZZLES

INTRODUCTION

WIDE RANGE OF CAPACITIES, CONNECTIONS AND MATERIALS TO MATCH YOUR APPLICATION

Styles:
- Conventional
- Quick-connect

Spray patterns:
- Standard
- Extra wide angle
- Wide angle

Spray angles: 43° to 180°

Flow rate range: .05 to 3320 gpm (.19 to 12568 lpm)

Operating pressure range: up to 2000 psi (138 bar)

Connections:
- 1/8" to 6" pipe sizes
- Flange
- Female and male NPT and BSPT

Materials:
- Brass
- Mild steel
- 303 stainless steel
- 309 stainless steel
- 316 stainless steel
- Hardened stainless steel
- Polypropylene
- Polyvinyl chloride
- PTFE
- Other specialty materials available

See Trademark Registration and Ownership, page i-1.

OPTIMIZE THE PERFORMANCE OF HOLLOW CONE NOZZLES:

Prevent clogging problems by using a **T-style strainer**. Our 124 strainers are available in several styles for use in high flow rate applications. Options include self-cleaning versions, large screen sizes to reduce cleaning frequency and more. **See page F4**

For quick and easy in-line manual shut-off, use our **23220 ball valve**. Two activation options – handle or hex Allen wrench. Available with a wide range of connection options. **See page F29**

Accurately monitor liquid pressure with durable, accurate **pressure gauges**. Grade B accuracy, corrosion resistance, impact resistance and psi/bar dual scales are just a few of the features these gauges offer. **See page F38**

UNIJET® NOZZLES:
STANDARD AND WIDE ANGLE SPRAYS

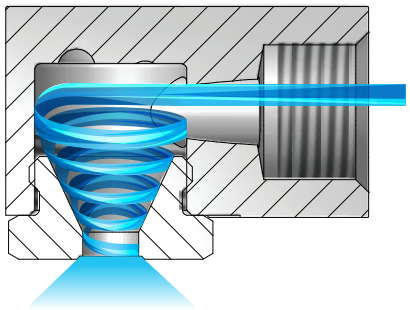
WHIRLJET® NOZZLES:
IN-LINE STANDARD, IN-LINE WIDE ANGLE, OFFSET-TYPE STANDARD AND DEFLECTED SPRAYS

OVERVIEW: WHIRLJET STANDARD, WIDE AND EXTRA WIDE ANGLE NOZZLES

- Hollow cone spray pattern with a circular impact area
- Large, unobstructed flow passages minimize clogging
- Good atomization of liquids at lower pressures – ideal for fluid cooling applications
- Removable caps for easy inspection and cleaning on some models
- Slope-bottom design models reduce the drilling effect of the fluid vortex in the fluid chamber and premature wear
- AX and BX nozzles form smaller drops; ideal for use in air washers and dust suppression applications
- CX, CF, CRC and D nozzles feature higher flow rates; ideal for use in larger, evaporative cooling spray ponds
- AP, LAP and LBP nozzles are constructed of polypropylene and feature excellent corrosion resistance at temperatures up to 160°F (71°C); patented center post design provides extended wear life of the nozzle
- Standard, wide and extra wide spray angles

WhirlJet Nozzles

As liquid enters the nozzle, it passes into a whirlchamber and begins to spin in a circle at high speed. The rotation forces the liquid away from the center toward the edges of the whirlchamber. This causes the liquid to exit the orifice in a hollow cone pattern. Some WhirlJet nozzles have a slope bottom in the whirlchamber that helps extend wear life.



WHIRLJET AX, BX, CX AND D NOZZLES

- Spray angles: Standard – 43° to 91°, Wide – 112° to 120°
- Uniform spray distribution:
  - AX and BX nozzles – from .03 to 38 gpm (.19 to 145 lpm)
  - CX, CRC, CF and D nozzles – from 2.0 to 2362 gpm (7.3 to 9010 lpm)
- Operating pressures from 3.0 to 100 psi (0.2 to 7.0 bar)

Contact your local sales engineer for information about junction boxes.

S W

AX
1/8" to 3/4" female conn.
Slope-bottom design
Removable cap

S

CX
1" to 2-1/2" female conn.
Slope-bottom design
One-piece cast-type

WHIRLJET OPTIONS

S W

BX – 1/8" to 3/4" male conn.
Slope-bottom design
Removable cap

S

CRC
1-1/4" to 4" female conn.
Two-piece cast-type

S

CF
4" to 6" flange conn.
Two-piece cast-type

S

D
1/2" to 3/4" male conn.
One-piece cast-type

RELATIVE DROP SIZE IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

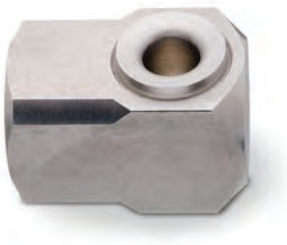
WHIRLJET AP, LAP, LBP AND E NOZZLES

- Spray angles: Standard – 43° to 91°, Wide – 112° to 120°, Extra wide – 144° to 165°
- Uniform spray distribution:
  - AP, LAP and LBP nozzles – from .14 to 18.9 gpm (.20 to 15.9 lpm)
  - E nozzles – from .11 to 16.8 gpm (.41 to 64 lpm)
- Operating pressures from 3.0 to 100 psi (0.2 to 7.0 bar)

S W

AP
1/4" to 3/8" female conn.

W



E
One-piece bar stock
1/4" to 3/8" female conn.

WHIRLJET OPTIONS

S W

LAP
3/8" to 1/2" female conn.

S W

LBP
3/8" male conn.

W

E
One-piece cast-type
3/8" to 1/2" female conn.

ORDERING INFORMATION

WHIRLJET AX

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: 1/4 AX – SS 10

BSPT connections require the addition of a "B" prior to the inlet connection.

WHIRLJET AP-W (9360)

Nozzle Series No.	–	Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: 9360 – 3/8 AP – PP 3-5W

BSPT connections require the addition of a "B" prior to the inlet connection.

WHIRLJET CF FLANGE CONNECTION

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: 6 CF – SS 550-65

BSPT connections require the addition of a "B" prior to the inlet connection.

WHIRLJET E

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example: 1/4 E – SS 10

BSPT connections require the addition of a "B" prior to the inlet connection.

QUICK REFERENCE GUIDE

Model	Connection/ Type	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
AX	F	1/8 to 3/4	Brass, Mild steel (I), 303 stainless steel (SS), 316 stainless steel (316SS)	D6–D7	D15
BX	M	1/8 to 3/4		D6–D7	
AX-W	F	1/8 to 1/2		D8	
BX-W	M	1/8 to 1/2		D8	
CX	F, Cast	1 to 2-1/2	Brass, 316 stainless steel (SS)	D9	
CF	Flange, Cast	4 to 6		D10	D16
CRC	F, Cast	1-1/4 to 4		D10	
D	M, Cast	1/2 to 3/4	Brass	D11	
AP (9360)	F	1/4 to 3/8	Polypropylene (PP)	D11–D12	
LAP (9360)	F	3/8 to 1/2		D11–D12	D17
LBP (9360)	M	3/8		D11–D12	
AP-W (9360)	F	1/4 to 3/8		D13	D16
LAP-W (9360)	F	3/8 to 1/2		D14	D17
LBP-W (9360)	M	3/8		D14	
E	F	1/4 to 1/2	303 stainless steel (SS)	D14–D15	
E	F, Cast	3/8 to 1/2	Brass, 316 stainless steel (SS)	D14–D15	

F = female thread; M = male thread. There is no material code for brass. Leave material code blank when ordering. Other materials available upon request.
For more dimensions and sizes, contact your sales engineer.

Based on the largest/heaviest version of each type.

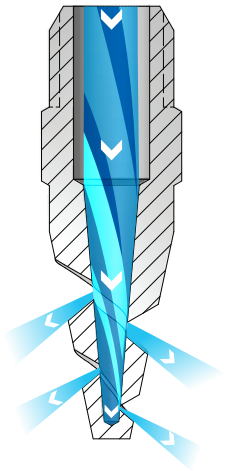
OVERVIEW: SPIRALJET

- Hollow cone spray pattern with a circular impact area
- Minimal clogging – maximum flow through passages of any nozzle of comparable size
- Spray angles: Standard – 50° to 180°
- Uniform spray distribution from .49 to 3320 gpm (2.0 to 11967 lpm)
- Operating pressures up to 400 psi (25 bar)
- Precision impact blade angles distribute drops and provide excellent coverage – ideal for washing, rinsing and cooling
- Compact size
- BSFJ flange-type nozzles available with reaction-bonded silicon carbide tips on FRP flanges available upon request



SpiralJet BSJ Nozzles
The liquid entering the nozzle passes through the orifice and exits the voids in the spiral. As it exits, the fluid deflects off the spiral surfaces to form the hollow cone pattern.

SPIRALJET OPTIONS

S

BSJ – 1/4" to 2" male conn.
Threaded/Hex. body style/brass

S

BSJ – 1/4" to 4" male conn.
Threaded/Round or flat body style/stainless steel

Custom sizes and other abrasion-resistant materials available. See Quick Reference Guide.

ORDERING INFORMATION

SPIRALJET

Inlet Conn.	Nozzle Type	–	Material Code	Spray Angle	Capacity Size

Example: 1/4 BSJ – SS 120 07

BSPT connections require the addition of a "B" prior to the inlet connection.

QUICK REFERENCE GUIDE

Model	Connection/Type	Connection Size (in.)	Materials	Page Number: Performance Data	Page Number: Dimensions and Weights
BSJ	M, Hex.	1/4 to 2	Brass, 316 stainless steel (316SS)	D19	D19
	M, Flats	1/4 to 4	316 stainless steel (316SS)		
	M, Flats, Cast	1/4 to 4	316 stainless steel (SS)		
	M, Round	1/4 to 4	PTFE (TEF), Polyvinyl chloride (PVC)		

M = male thread. There is no material code for brass. Leave material code blank when ordering. Other materials available upon request.
For more dimensions and sizes, contact your sales engineer.

RELATIVE DROP SIZE IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

Maximum Free Passage Diameter is the maximum diameter as listed of foreign matter that can pass through the nozzle without clogging.
For all 1/4" and 3/8" connections, optimum spray angle is achieved at 40 psi (2.8 bar).
*Maximum operating pressure depends on material, size and application. Contact your local sales engineer for specific recommendations.
Highlighted column shows the rated pressure.

DIMENSIONS AND WEIGHTS

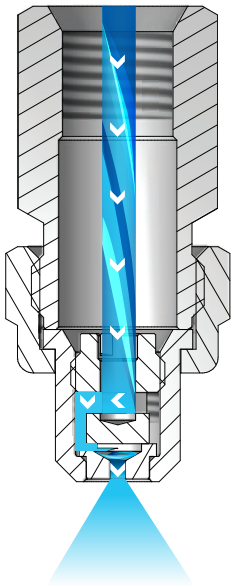
Based on the largest/heaviest version of each type.

OVERVIEW: UNIJET

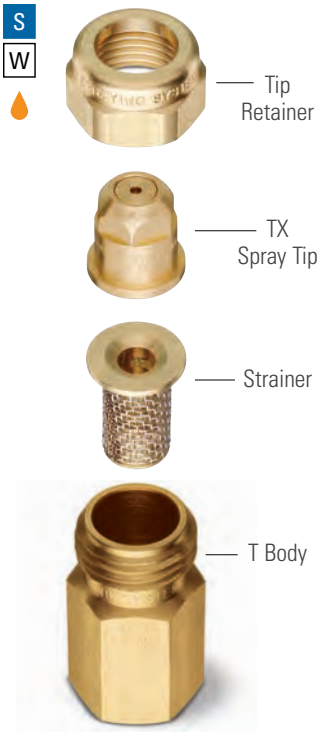
- Quick-connect nozzles reduce maintenance time – bodies remain on pipe/header
- Save on nozzle replacement costs – bodies can be reused, only spray tips are replaced; tips fit on male or female bodies
- Hollow cone spray pattern with a circular impact area
- Excellent atomization at relatively low pressures
- Spray angles: Standard – 13° to 114°, Wide – 130° to 140°
- Uniform spray distribution from 3.6 to 4,920 gph (13.2 to 17,760 lph)
- Operating pressures up to 400 psi (25 bar)
- Orifice inserts, cores and strainers are easily removed for inspection or cleaning
- TN versions provide very fine atomized sprays using liquid pressure alone; compressed air not required
  - Spray angles: Standard – 43° to 91°
  - Uniform spray distribution from .82 to 184 gph (3.1 to 701 lph)
  - Operating pressures up to 2000 psi (140 bar)



UniJet TX, D and TN Nozzles

As the liquid passes through the nozzle, it is forced to pass through slots in the orifice. These slots make the liquid spin in a circle at a high speed as it exits the orifice, creating the hollow cone pattern.

UNIJET OPTIONS



TX Spray Tip + T Body
1/4" female conn.
Use with screen strainer and tip retainer

D Spray Tip + TT Body
1/4" male conn.
Disc and core type
Use with slotted strainer and tip retainer

TN Spray Tip
Fine/hollow cone spray tip

TN-SSTC Spray Tip
High-pressure tungsten carbide orifice tip

T Body/Cap
1/8" to 1/2" female conn.
Use with TX, D, T-W or TN tips

TT Body/Cap
1/8" to 1/2" male conn.
Use with TX, D, T-W or TN tips

11430 High Pressure Body
1/4" female conn.
Use with TN-SSTC tips

ORDERING INFORMATION

UNIJET

NOZZLE BODY + SPRAY TIP

Inlet Conn. | Body Type – Material Code + Tip Type – Material Code | Capacity Size

Example: 1/4 T – SS + TX – SS 1.25

UniJet nozzle assemblies include a pre-sized wire mesh based on orifice diameter.
When ordering just a UniJet spray tip, the mesh is not included.
See Accessories, page F6 for a mesh selection guide and ordering information.

BSPT connections require the addition of a "B" prior to the nozzle body inlet connection.

UNIJET – DISC AND CORE TYPE

NOZZLE BODY + ORIFICE DISC AND CORE

Inlet Conn. | Body Type – Material Code + Orifice Disc No. – Core No. | Core Material Code

Example: 1/4 TT – SS + D4 – 25 HSS

BSPT connections require the addition of a "B" prior to the nozzle body inlet connection.

DISC ONLY

Orifice Disc No.

Example: D4

CORE ONLY

Core No. – Core Material Code

Example: DC25 – HSS

UNIJET HIGH PRESSURE

NOZZLE BODY + SPRAY TIP

Body Type – Inlet Conn. – Material Code – Strainer Screen Mesh Size + Tip Type – Material Code | Capacity Size

Example: 11430 – 1/4 – SS – 100 + TN – SSTC 10

BSPT connections require the addition of a "B" prior to the nozzle body inlet connection.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights

For nozzles using Orifice Disc Nos. 1, 1.5 and 2 or Core Nos. 13 and 23, Slotted Strainer No. 4514-20 equivalent to 25 mesh screen size is supplied. For all other larger capacity Discs and Cores, Slotted Strainer No. 4514-32 equivalent to 16 mesh screen size is supplied.

Other body types may be available. Contact your sales engineer for more information.

For additional information see Data Sheet 4498-1.

Highlighted column shows the rated pressure.

Spray pattern diameter is based on liquid with viscosity of 20 seconds #3 Zahn Cup spraying at 1600 psi (110 bar).

Coverage will vary with viscosities and pressures. Tabulated capacities are based on water.

Other body types may be available. Contact your sales engineer for more information.

Calibration pressure = 40 psi (3 bar).

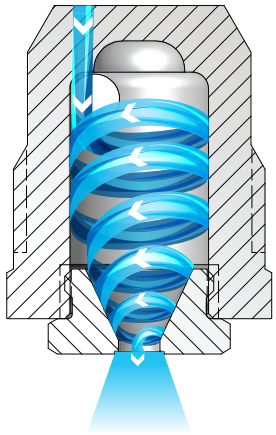
OVERVIEW: WHIRLJET IN-LINE, OFFSET AND DEFLECTED SPRAYS

- Hollow cone spray pattern
- In-line versions ideal for dust control in mining operations
  - BD versions have a lower profile projection for installation in a tee or pipe header
  - In-line BDM features recessed orifice area to protect from damage; self-locking cap to prevent loss due to vibration; fiberglass-reinforced nylon inlet body
- BA offset style ideal for installations with physical space limitations
- Spray angles: Standard – 43° to 94°, Wide – 102° to 125°
- Deflected spray versions available with 120°, 150° and 180° included angle of spray at 10 psi (0.7 bar)
- Uniform spray distribution from .11 to 38 gpm (.41 to 145 lpm)
- Operating pressures up to 500 psi (35 bar)



WhirlJet BD, BDM and BA Nozzles

Liquid passes through a hole on the inlet side of the nozzle. The liquid then enters a whirlchamber where it spins in a circle at high speed. The rotation forces the liquid away from the center toward the edges. This causes the liquid to exit the orifice in a hollow cone pattern.

WHIRLJET OPTIONS

S W

BD
3/8" to 1-1/2" male conn.
In-line nozzle
Removable cap

S

BDM "Miner Nozzle"
3/8" male conn.
In-line nozzle
Removable cap/nylon body

S

BA
3/8" to 1/2" male conn.
Offset style nozzle
Removable cap

W

DeflectoJet® 8686
1/8" to 3/8" male conn.
Deflected nozzle
Removable deflector cap

RELATIVE DROP SIZE IN MICRONS

10 to 100	100 to 500	500 to 1000	1000 to 5000

Drop size will vary based on flow rate and pressure.

WHIRLJET® NOZZLES: IN-LINE STANDARD, IN-LINE WIDE ANGLE, OFFSET-TYPE STANDARD AND DEFLECTED SPRAYS

S STANDARD ANGLE SPRAY | W WIDE ANGLE SPRAY

ORDERING INFORMATION

WHIRLJET BD

Inlet Conn. | Nozzle Type | – | Material Code | Capacity Size

Example: **3/8** **BD** – **SS** **10**

BSPT connections require the addition of a "B" prior to the inlet connection.

WHIRLJET BDM

Inlet Conn. | Nozzle Type | – | Capacity Size

Example: **3/8** **BDM** – **5**

BSPT connections require the addition of a "B" prior to the inlet connection.

WHIRLJET BA

Inlet Conn. | Nozzle Type | – | Material Code | Capacity Size

Example: **1/2** **BA** – **SS** **25**

BSPT connections require the addition of a "B" prior to the inlet connection.

DEFLECTOJET 8686

Nozzle No. – Inlet Conn. – Material Code | Capacity Size – Spray Angle

Example: **8686** – **1/4** – **SS** **1** – **120**

BSPT connections require the addition of a "B" prior to the nozzle number.

QUICK REFERENCE GUIDE

Model	Connection	Connection Size (in.)	Materials	Page Number	
				Performance Data	Dimensions and Weights
BD	M	3/8 to 1-1/2	Brass, 303 stainless steel (SS)	D29	D32
BD-W	M	3/8 to 3/4	Brass, 303 stainless steel (SS)	D30	
BDM	M	3/8	Nylon/Brass cap	D30	
BA	M	3/8 to 1/2	Brass, 303 stainless steel (SS), 309 stainless steel (309SS)	D31	
8686	M	1/8 to 3/8	Brass, 303 stainless steel (SS)	D31	

M = male thread. There is no material code for brass. Leave material code blank when ordering. Other materials available upon request.
For more dimensions and sizes, contact your sales engineer.

FINE SPRAY NOZZLES

INTRODUCTION

FULL RANGE OF HYDRAULIC ATOMIZING NOZZLES — SMALL DROPS WITHOUT COMPRESSED AIR

Styles:
- Conventional

Spray patterns:
- Standard
- Narrow
- Wide angle

Spray angles: 30° to 165°

Flow rate range: 49.2 to 8,160 gph (186 to 30,948 lph)

Operating pressure range: up to 1000 psi (69 bar)

Connections:
- 1/4" to 1-1/2" pipe sizes
- Female and male NPT and BSPT

Materials:
- Brass
- 303 stainless steel
- 316 stainless steel
- Polyvinyl chloride
- Other specialty materials available

See Trademark Registration and Ownership, page i-1.

OPTIMIZE THE PERFORMANCE OF FINE SPRAY NOZZLES:

Use a **high-pressure strainer** to protect fine spray nozzles from contaminants. Maximum operating pressure of 2000 psi at 150°F (138 bar at 66°C) and 5000 psi at 150°F (345 bar at 66°C).
See page F5

Regulate liquid pressure from 5 to 125 psi (0.3 to 8.5 bar) with our durable diaphragm-type non-relieving **liquid regulators**. Choose from brass, brass-plated zinc or stainless steel.
See page F36

CV check valves minimize pressure drop and ensure positive drip-free shut off. Choose from a wide range of inlet and outlet options and opening pressure of 5, 10 or 20 psi (0.35, 0.7 or 1.5 bar).
See page F26

FINE SPRAY NOZZLES

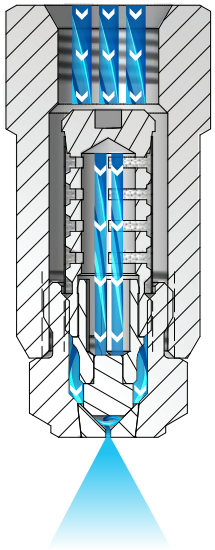
TABLE OF CONTENTS

HYDRAULIC ATOMIZING NOZZLES:
STANDARD AND WIDE ANGLE SPRAYS

FOGJET® NOZZLES:
WIDE AND NARROW ANGLE SPRAYS

OVERVIEW: HYDRAULIC ATOMIZING

- Finely atomized, hollow cone spray without compressed air
- Very small drops often achieving misting performance
- Ideal for use in dust control and humidification applications
- Wall-mount options for installation on room walls, vessel bulkheads or pipeline
- Orifice inserts, cores and strainers are easily removed for inspection or cleaning
- Most models can be supplied with an internal strainer
- Spray angles: Standard – 43° to 94°, Wide – 112° to 120°
- Uniform spray distribution from .82 to 130 gph (3.1 to 492 lph)
- Operating pressures from 20 to 1000 psi (1.5 to 69 bar)



Hydraulic Atomizing Nozzles

The liquid passes through slots in the core component. The slots make the liquid spin in a circle at a very high speed. The energy from the spinning action causes the liquid to break up into very small droplets and form a hollow cone pattern as it exits the orifice.

OVERVIEW: FOGJET

- Finely atomized sprays without use of compressed air; ideal for fogging a larger area with a single nozzle
  - 7N and 7G nozzles produce a shower-like full cone wide angle spray pattern
  - FF nozzles produce a dense, narrow, hollow cone spray pattern
- 7N and 7G assemblies include a nozzle body and seven removable caps. Each cap has an internal core or vane which is easily removed for cleaning
- Widely used in fire protection, dust control and rain simulation applications
- Uniform spray distribution from .11 to 136 gpm (.42 to 505 lpm)
- Operating pressures from 20 to 150 psi (1.5 to 10 bar)

FogJet Nozzles

The liquid passes through slots in the core component in each individual nozzle cap. The slots make the liquid spin in a circle at a very high speed. The energy from the spinning action causes the liquid to break up into very small droplets and form a hollow cone pattern as it exits the orifice.

ACCESSORIES

ACCESSORIES

INTRODUCTION

OPTIMIZE PERFORMANCE AND SIMPLIFY INSTALLATION

Simplify Nozzle Mounting and Positioning
- Split-eyelet connectors
- Adjustable ball fittings
- Adjustable hoses and mounting bases

Options for Quick-Connect Nozzle Systems
- Strainers
- Flow stabilizers
- Metering plates
- Color-coded caps

Ensure Proper Flow Control and Regulation
- Check valves, throttling valves, pressure relief valves and more
- Air pressure regulators
- Liquid pressure regulators

Clog Prevention
- Liquid strainers
- Filtration assemblies
- Air line filters

SIMPLIFY INSTALLATION, OPERATION AND MAINTENANCE

Prevent particles and debris from obstructing flow with **nozzle and fluid line strainers**. Choose from a wide range of inlet connections, materials, mesh size and more.
See pages F4 and F16

Connect nozzles to pipes in minutes with leak-proof **split-eyelet connectors**. Connectors clamp on 1/2" to 2" pipes.
See page F23

Easily control line pressure and minimize waste with **adjustable relief valves**. Excess liquid is returned back to the liquid source or pump inlet.
See page F31

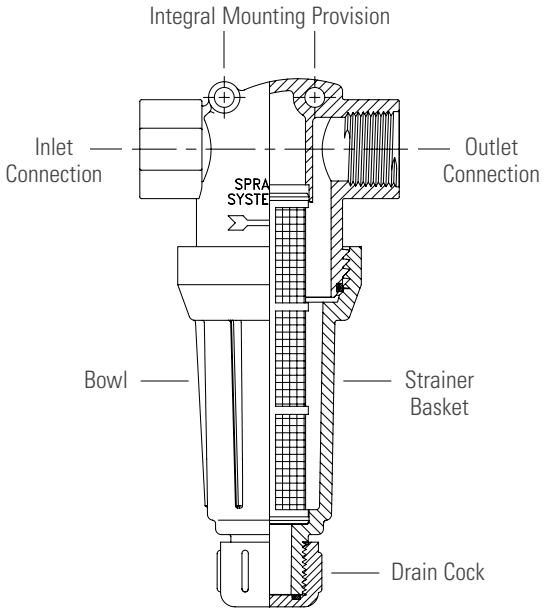
ACCESSORIES
TABLE OF CONTENTS

OVERVIEW: LIQUID STRAINERS

- Liquid strainers protect nozzles, valves and pumps from damaging debris and minimize clogging
- Wire mesh options ensure screening of particulate as small as 63 microns

T-Style Strainer

T-strainers feature a removable bottom cap or plug for complete withdrawal of the screen assembly during cleaning. On some models, the bottom pipe plug can be replaced with a drain cock for quick-flush cleaning. Models with a clear nylon bowl allow easy visual inspection of the internal screen. Self-clean designs allow filtered liquid to pass through, while liquid particles are returned back to the liquid supply through a return outlet.



STRAINER OPTIONS

TWD

1/4", 3/8", 1/2", 3/4", 1", 1-1/4", 1-1/2", 2", 2-1/2" female conn.

Removable bottom plug for easy screen cleaning

Bottom plug can be replaced with drain cock for flush cleaning

Max. pressure: 300 psi (20 bar)

Materials: Aluminum, brass, stainless steel

Mesh: 16, 30, 50, 80, 100, 40 x 200 Dutch weave

16106

1-1/2", 2", 2-1/2" female conn.

Removable bottom plug for easy screen cleaning

Bottom plug can be replaced with drain cock for flush cleaning

Max. pressure: 200 psi (14 bar)

Materials: Brass, stainless steel

Mesh: 16, 50, 80, 100

9830

3/4", 1" female conn.

Hand removable ribbed bottom cap for easy cleaning of screen

Max. pressure: 300 psi (20 bar)

Materials: Aluminum, brass, ductile iron

Mesh: 16, 50, 100

AA122

1/2", 3/4" female conn.

Hand removable outer bowl for easy screen cleaning

Max. pressure: 150 psi at 100°F (10 bar at 38°C)

Materials: Polypropylene, polypropylene head with clear nylon bowl

Mesh: 15, 30, 50, 80, 100, 200, 40 x 200 Dutch weave

STRAINER OPTIONS

AA124/AA430

3/4", 1", 1-1/4", 1-1/2", 2", 2-1/2" female conn.*

Larger size screen area requires less frequent cleaning

Self-cleaning styles and versions with mounting lugs available

AA124 and AA430 versions are the same except for materials and inlet connections

Strainer Type	Strainer Part No.	Material**	Max. Pressure	Mesh Sizes
124	AA124-AL	Aluminum head/ nylon bowl	150 psi (10 bar)	16, 30, 50, 80, 100
124ML with mounting holes***	AA124ML-AL	Aluminum head/ nylon bowl	150 psi (10 bar)	16, 30, 50, 80, 100
124A self-cleaning version	AA124ASC-NYB	Aluminum head/ nylon bowl	110 psi (8 bar)	16, 30, 50, 80, 100
430ML with mounting holes***	AA430ML	Polypropylene head/nylon bowl	110 psi (8 bar)	16, 30, 50, 80, 100, 120, 200****
430 self-cleaning version	AA430SC	Polypropylene head/nylon bowl	75 psi (5 bar)	16, 30, 50, 80, 100, 120, 200****

*Inlet connections vary. See pages F8 and F9.

**Max. temperature for plastic 100°F (38°C); max. temperature for metal 180°F (82°C).

***For mounting on machinery or angle iron.

****120 only for 1-1/4" and 1-1/2" sizes; 200 only for 3/4" and 1" sizes.

15925

3/4", 1" female conn.

Removable bottom plug for easy flush cleaning of screen

Max. pressure: 2000 psi at 150°F (138 bar at 66°C)

Material: Black oxide-coated mild steel body

Mesh: 50

8310A

1/4", 3/8", 1/2" female conn.

Removable bottom plug for easy flush cleaning of screen

Max. pressure: 5000 psi at 150°F (345 bar at 66°C)

Material: Stainless steel

Mesh: 16, 30, 50, 100

2820

1/4", 3/8", 1/2" female inlet conn.

1/4" female outlet conn.

Max. pressure: 5000 psi at 150°F (345 bar at 66°C)

Material: Stainless steel

Mesh: 16, 30, 50, 100

ORDERING INFORMATION

TWD STRAINER

Inlet Conn. – Strainer Type – Material Code – Mesh Size

Example: 1/4 – TWD – SS – 100

BSPT connections require the addition of a "B" prior to the inlet connection.

16106 STRAINER

Strainer Prefix No. – Inlet Conn. – Strainer Type – Material Code – Mesh Size

Example: 16106 – 2 – TW – B – 100

BSPT connections require the addition of a "B" prior to the inlet connection.

9830 STRAINER

Strainer Prefix No. – Inlet Conn. – Strainer Type – Mesh Size

Example: 9830 – 1 – TW – 50

BSPT connections require the addition of a "B" prior to the inlet connection.

AA124 SELF-CLEANING STRAINER

Strainer Type – Inlet Conn. – Self Cleaning – Material Code – Mesh Size

Example: AA124 – 1-1/4 – SC – NYB – 50

BSPT connections require the addition of a "B" prior to the inlet connection.

ORDERING INFORMATION

15925 STRAINER

Strainer Type – Inlet Conn.

Example: 15925 – 3/4

BSPT connections require the addition of a "B" prior to the inlet connection.

8310A STRAINER

Strainer Type – Inlet Conn. – Mesh Size

Example: 8310A – 3/8 – 100

BSPT connections require the addition of a "B" prior to the inlet connection.

2820 STRAINER

Strainer Type – Inlet Conn. – Material Code – Mesh Size

Example: 2820 – 1/4 – SS – 16

BSPT connections require the addition of a "B" prior to the inlet connection.

FILTRATION ASSEMBLY

- Filtration assemblies remove grit, scale and organic solids to help ensure nozzle performance and extend wear life – ideal for industrial and potable water
  - – Removes slimy solids and algae from process water without premature loading
  - – Extra solids holding capacity provides long service life and reduced maintenance
  - – Low pressure drop and exceptional flow capacity
  - – No tools required for disassembly or cleaning

39185 Filtration Assembly

3/4" female conn.

Max. pressure: 125 psi (8.4 bar)

Max. temperature of element: 190°F (88°C)

Max. temperature of housing: 120°F (50°C)

Materials: Clear styrene, acrylonitrile and polypropylene

Filter sizes: 80, 130 and 300

Filter openings: .007" (18 mm) for 80; .005" (.13 mm) for 130; .002" (.05 mm) for 300.

MATERIAL	CODE
Polypropylene	PP
Polypropylene head/clear nylon bowl	NYC
Clear Styrene Acrylonitrile	SAN

AIR LINE FILTERS

- Air line filters protect equipment from corrosion and excessive wear by removing liquid and contaminants from air lines
  - – Manual drain air line filter – simple petcock at the bottom of the bowl enables manual drainage; filter is easily accessible
  - – Automatic drain air line filter – for use in inaccessible locations; a float-operated mechanism automatically expels liquid when over a critical level

11438 Air Line Filter

1/4", 3/8", 1/2", 3/4", 1" female conn.

Manual or automatic drain

50 micron filter element

Max. pressure: 150 psi (10 bar)

Max. temperature: 125°F (50°C)

Air Line Filter No.	Air Line Filter Type		Inlet Conn. (in.)	Approx. Flow at 100 psi*	
	Manual	Automatic		scfm	lpm

OVERVIEW: QUICK-CONNECT NOZZLE SYSTEMS

- Save time cleaning and replacing spray nozzles with quick-connect nozzles. Nozzle bodies stay on header; spray tips are easily removed for cleaning and replacement
  - – QuickJet® Nozzle System
    - Install and replace spray tips in seconds – quick-quarter turn is all that is needed
    - Automatic spray tip alignment
    - Integral seals eliminate leaks and stay in place during tip installation and removal
    - Choice of metal or chemically-resistant ProMax® material for use up to 150 psi (10 bar)
  - – UniJet® Nozzle System
    - Fast spray tip removal and installation using wrench
    - Metal materials

QuickJet and UniJet nozzles are available in full cone, flat spray and hollow cone spray patterns. See those catalog sections for complete details.

QUICKJET ADAPTERS FOR UNIJET SPRAY TIPS

- QuickJet retaining caps allow easy use of UniJet nozzles
- Split-eyelet versions make connecting spray nozzles to piping systems quick and easy
  - – Simply drill a hole in side of pipe
  - – Place inlet of split eyelet into the hole; integral seal eliminates leaking
  - – Assemble the clamp component to secure the assembly to the pipe
- Compatible with all UniJet spray tips

QUICK-CONNECT ADAPTER OPTIONS

QJ17560A-NYB

1/2", 3/4", 1", 20 mm, 25 mm pipe

Positive shut-off with ChemSaver® check valve

Max. pressure: 300 psi (20 bar)

QJ7421-NYB

1/2", 3/4", 1" pipe

Max. pressure: 300 psi (20 bar)

QJ1/4TT-NYB

1/4" male conn.

Max. pressure: up to 300 psi (20 bar)

QJ1/4T-NYB

1/4" female conn.

Max. pressure: up to 300 psi (20 bar)

ORDERING INFORMATION

QUICKJET® ADAPTERS QJ17560 AND QJ7421

Model No. – Pipe Size – Material Code + UniJet® Spray Tip

Example: QJ17560A – 1/2 – NYB + UNIJET SPRAY TIP

EPDM rubber diaphragm seal standard on QJ17560 and QJ7421. For Viton®, add VI after material code. Example: NYB-VI

QUICKJET ADAPTERS QJ1/4TT AND QJ1/4T

Model Type | Inlet Conn. | Body Code – Material Code + UniJet Spray Tip

Example: QJ | 1/4 | TT – NYB + UNIJET SPRAY TIP*

*Additional cap required. See your sales engineer for alternative caps available.
BSPT connections require the addition of a "B" prior to the inlet connection.

UNIJET DIAPHRAGM CHECK VALVE NOZZLE BODIES

- Diaphragm design minimizes pressure loss through check valve
- Max. pressure: 300 psi (20 bar)
- Stainless steel valve seat

MATERIAL	CODE
Aluminum	AL
Brass	No code
Nylon	NYB

UNIJET DIAPHRAGM CHECK VALVE BODY OPTIONS

4664B

1/8" male conn.

Max. flow rate: 1.5 gpm (5.7 lpm)

Materials: Aluminum, brass

8360

1/4" male conn.

Max. flow: 2 gpm (7.6 lpm)

Stainless steel springs: opening pressures of 2, 5, 8, 15, 20 or 30 psi (0.14, 0.35, 0.55, 1.03, 1.4 or 2.07 bar)

Material: Nylon

UNIJET SPLIT-EYELET BODIES

- Quick and easy way to mount UniJet spray nozzles on piping systems
  - – Simply drill a hole in side of pipe
  - – Place inlet of split eyelet into the hole; integral seal eliminates leaking
  - – Assemble the clamp component to secure the assembly to the pipe
- Max. pressure: up to 250 psi (17 bar)
- Max. flow rate: 3 gpm (11.4 lpm)
- Body and clamp materials: Brass, stainless steel

MATERIAL	CODE
Brass	No code
303 stainless steel	SS

7421

1/2", 3/4", 1" pipe size

13/16" to 7/8" (20 to 22 mm), 1 to 1-11/16" (25 to 27 mm) or 1-1/4" to 1-3/8" (32 to 35 mm) tubing O.D.

ORDERING INFORMATION

UNIJET STRAINERS AND FILTER

- Use with most standard UniJet and Quick UniJet body assemblies
- In-line design for use at tip
- Low pressure loss
- Easy installation and removal
- Corrosion resistant versions
- Stainless steel mesh; other materials available upon request
- Pair most styles with CP4743 nylon gasket to prevent leaks

Note: Standard UniJet and Quick UniJet nozzles include a strainer. Mesh size is based on orifice diameter. Order strainers separately only if ordering replacement spray tip or if a special version is needed.

FILTER OPTION

9106 Filter

Effective filtration

Higher filtration than other strainers; 300 mesh equivalent

Material: Fused bronze – durable and corrosion resistant

STRAINER OPTIONS

6051 303 stainless steel

5053 brass

8079 polypropylene

Mesh: 24, 50, 100 and 200

4193A

Built-in check valve

Stainless steel springs: opening pressures of 5, 10, 20 or 40 psi (0.35, 0.7, 1.5 or 2.8 bar)

Materials: Aluminum, brass, polypropylene, 303 stainless steel

Mesh: 24, 50, 100, and 200

4514

One-piece design

Slotted design accommodates larger particulates

Materials: Brass or nylon with 16, 25 or 50 mesh equivalents; aluminum with 16 or 25 mesh equivalents

4067

Cup design for use when space is limited

Material: 303 stainless steel

Mesh: 30, 50, 100 and 200

7630

Disc design for use when space is extremely limited

Material: 303 stainless steel

Mesh: 30, 50, 100 and 200

MATERIAL	CODE
Aluminum	AL
Brass	No code
Nylon	NY
Polypropylene	PP
303 stainless steel	SS

ORDERING INFORMATION

UNIJET STRAINERS 5053, 6051 AND 8079

Strainer Type – Material Code – Mesh Size

Example: **6051** – **SS** – **50**

UNIJET STRAINER 4193A

Strainer Type – Material Code – Spring Opening Pressure (psi) – Mesh Size

Example: **4193A** – **SS** – **5** – **50SS**

Spring opening pressure is ordered in psi.

UNIJET STRAINER 4514

Strainer Type – Material Code – Slot Width

Example: **4514** – **NY** – **10**

Use slot width 10 for 50 mesh equivalent; slot width 20 for 25 mesh equivalent and slot width 32 for 16 mesh equivalent.

UNIJET STRAINERS 4067 AND 7630

Strainer Type – Mesh Size

Example: **4067** – **200**

	**9106**	0.75	0.594	0.22

11370 JET STABILIZER

- Install just before the spray nozzle to reduce fluid turbulence
- Helps reduce spray pattern flutter, increase fluid throw distance and increase impact force
- Ideal when nozzles are installed in 90° elbow forcing fluid to change direction
- For use with UniJet flat spray and hollow cone nozzles

11370 Jet Stabilizer

1/8" x 1/8", 1/4" x 1/4", 3/8" x 3/8", 1/2" x 1/2", 3/4" x 3/4", 1" x 1", 1-1/4" x 1-1/4"
male inlet conn./female outlet conn.

Materials: Brass, stainless steel

11750 LARGE CAPACITY CHECK VALVE

- Use instead of 4193A for higher flow rates – up to 1.5 gpm (5.7 lpm)
- Prevents dripping from nozzles after line pressure is shut-off
- Compatible with all UniJet spray tips with capacities from 0.4 to 1.5 gpm (1.5 to 5.7 lpm)

11750 Large Capacity Check Valve

Opening pressure: 5 psi (.35 bar)*

Materials: Stainless steel ball and spring; aluminum, brass, polypropylene, stainless steel bodies

*Opening pressure: 10 and 20 psi (0.7 and 1.5 bar) available upon request

CP1325 TIP RETAINER

- Standard nozzle retaining cap for all UniJet style assemblies
- Standard UniJet nozzle and Quick UniJet nozzles include a tip retainer. Order CP1325 when replacement is needed

CP1325 Tip Retainer

Materials: Brass, stainless steel

For high pressure applications, use 7890 tip retainer

4916 METERING PLATE

- Fine-tune flow rate between available nozzle sizes
- Orifice slows fluid; conserves water and may extend wear life

4916 Metering Plate

82 orifice diameters from .008 to .25" (0.2 to 6.35 mm)*

Max. flow rate: 6.9 gpm (26 lpm)

Material: Stainless steel

*Request data sheets 11739, 12417 and 23471-2 for complete information.

UNIJET ADAPTERS

- 4676 Adapter – Use to go from a standard UniJet body to a 1/8", 1/4", 3/8" or 3/4" female outlet
- 6406 Adapter – Use to go from UniJet thread to 1/8" male inlet conn.

ADAPTER OPTIONS

4676 Adapter

11/16"-16 female inlet conn.

Materials: Brass, stainless steel

6406 Adapter

1/8" male outlet conn.

Materials: Aluminum, brass, stainless steel

QUICK UNIJET ADAPTER AND CAPS

- Easily retrofit standard UniJet bodies and GunJet® spray guns to Quick UniJet styles
- Color-coded Quick UniJet caps allows quick identification of nozzles by type or flow rate in same production line
- EPDM gaskets to ensure proper sealing with spray tip. Viton® also available
- Material: Celcon or nylon
- Max pressure: 300 psi (20 bar)

ADAPTER OPTION

QJT-NYB Adapter

Fits 11/16"-16 UniJet thread

CAP AND TIP COMPATIBILITY

Use with:

- UniJet small capacity flat spray tips, standard sizes through TPU_08
  - – Celcon cap only: CP114440A
  - – Celcon cap and seat gasket: 114441A
- UniJet large capacity flat spray tips, standard sizes TPU_10 through TPU_20
  - – Nylon cap only: CP25609
  - – Nylon cap and seat gasket: 25610
- UniJet flat spray tips, sizes through TPU_08. All tips to be positioned parallel or perpendicular to wings of Quick UniJet cap
  - – Nylon cap only: CP25595
  - – Nylon cap and seat gasket: 25596
- UniJet tips: TC, TG, TK, TN, TPU, T-W and TX
  - – Celcon cap only: CP114444A
  - – Celcon cap and seat gasket: 114445A
- UniJet tips: Disk and core
  - – Celcon cap only: 114444A

OVERVIEW: SPLIT-EYELET CONNECTORS AND ADJUSTABLE BALL FITTINGS

- Use split-eyelet connectors to provide a quick and easy way to connect spray nozzles to piping systems
  - – Simply drill a hole in side of pipe
  - – Place inlet of split eyelet into the hole; seal eliminates leaking
  - – Assemble the clamp component to secure the assembly to the pipe
- Adjustable ball fitting enables precise control of spray direction. Assemble nozzle into the ball and adjust the orientation of the nozzle. Large internal passages minimize clogging

OVERVIEW: CHECK VALVES

- Positive drip-free shut-off maintains line pressure during on/off spraying cycles
- Minimal pressure drop through CV and diaphragm valves

CHECK VALVE OPTIONS

AB Ball

1/8", 1/4" male inlet and female outlet conn.

Max. pressure: 125 psi (9 bar)

Max. flow rate: 2 gpm (8 lpm)

5, 10 or 20 psi (0.35, 0.7 or 1.5 bar) opening pressures

Materials: Aluminum, brass, stainless steel

BB Ball

1/4" male inlet and male outlet conn.

Max. pressure: up to 125 psi (9 bar)

Max. flow rate: 0.5 gpm (2 lpm)

5, 10, 20 or 25 psi (0.35, 0.7, 1.5 or 1.7 bar) opening pressures

Materials: Brass, stainless steel

10742A Diaphragm

1/8", 1/4" male inlet and female outlet conn.

Max. flow rate: 2 gpm (8 lpm)

7 psi (0.5 bar) opening pressure

Materials: Aluminum, brass

12328 Diaphragm

1/2", 3/4" male inlet and female outlet conn.

Max. flow rate: 15 gpm (57 lpm)

7 psi (0.5 bar) opening pressure

Material: Nylon

CV Series

AACV 1/8", 1/4" female inlet and female outlet conn.

BACV 1/8", 1/4" male inlet and female outlet conn.

ABCV 1/8", 1/4" female inlet and male outlet conn.

BBCV 1/8", 1/4" male inlet and male outlet conn.

Max. pressure: 150 psi (10 bar)

5, 10 or 20 psi (0.35, 0.7 or 1.5 bar) opening pressures

Materials: Brass, stainless steel

MATERIAL	CODE
Aluminum	AL
Brass	No code
Nylon	NYB
303 stainless steel	SS

ORDERING INFORMATION

AB AND BB BALL-TYPE CHECK VALVES

Inlet/ Outlet Conn.	Check Valve Type	–	Material Code	Opening Pressure (psi)

Example: **1/8** **AB** – **SS** **20**

BSPT connections require the addition of a "B" prior to the inlet connection.
Opening pressure is ordered in psi.

10742A DIAPHRAGM CHECK VALVE

Check Valve Type	–	Inlet/ Outlet Conn.	–	Material Code

Example: **10742A** – **1/8** – **AL**

BSPT connections require the addition of a "B" prior to the inlet connection.

12328 DIAPHRAGM CHECK VALVE

Check Valve Type	–	Inlet/ Outlet Conn.	–	Material Code

Example: **12328** – **1/2** – **NYB**

BSPT connections require the addition of a "B" prior to the inlet connection.

CV SERIES CHECK VALVE

Inlet/ Outlet Conn.	Check Valve Type	–	Material Code	Opening Pressure (psi)

Example: **1/4** **ABCV** – **SS** **5**

BSPT connections require the addition of a "B" prior to the inlet connection.
Opening pressure is ordered in psi.

OVERVIEW: PLUG AND BALL VALVES

- Easy in-line shut-off
- Manual operation
- Ball valve provides more robust operation than plug valves
- Max. pressure: 400 psi (27 bar)

PLUG VALVE OPTIONS

23220 Plug Valve, Female x Female

Available in:
– 1/8" female inlet and 1/8" female outlet conn.
– 1/4" female inlet and 1/8" female outlet conn.
– 1/4" female inlet and 1/4" female outlet conn.

Materials: Brass body with Celcon® plug handle

23220 Plug Valve, Female x T Outlet

Available in:
– 1/4" female inlet and T outlet conn.
– 1/4" female inlet conn. and 11/16"-16 UniJet® thread outlet

Materials: Brass body with Celcon plug handle

23220 Plug Valve, Male x T Outlet

Available in:
– 1/4" male inlet and T outlet conn.
– 1/4" male inlet conn. and 11/16"-16 UniJet thread outlet

Materials: Brass body with Celcon plug handle

23220 Plug Valve, Male x Female

Available in:
– 1/4" male inlet and 1/4" female outlet conn.

Materials: Brass body with Celcon plug handle

23220 Plug Valve, Female x Male

Available in:
– 1/4" female inlet and 1/4" male outlet conn.

Materials: Brass body with Celcon plug handle

BALL VALVE OPTIONS

20900 Ball Valve

On/off ball type

UniJet system compatible

1/4" male or female inlet and 11/16"-16 UniJet thread outlet

Materials: Brass body and handle; stainless steel ball

ORDERING INFORMATION

PLUG VALVES

Based on the largest/heaviest version of each type.

OVERVIEW: THROTTLING AND PRESSURE RELIEF/REGULATING VALVES

- Easily regulate flow in systems using centrifugal pumps with throttling valves; adjustable cap and lock ring provide easy valve control
- Control line pressure and minimize liquid waste with adjustable relief valves that return excess liquid back to the liquid source or pump inlet

PRESSURE RELIEF REGULATING VALVE OPTIONS

23120

1/2", 3/4" male inlet and female outlet conn.

Pressure relief valve

Adjustable lock nut

Material: Polypropylene

8460

1/2", 3/4" male inlet and female bypass conn.

Diaphragm-style pressure relief valve

Female pressure gauge port and plug for use when pressure gauge not used

Fairprene® diaphragm seal prevents fluid from working parts

Materials: Aluminum housing with nylon body

6815

1/2", 3/4" male inlet and female outlet conn.

Piston-type pressure relief valve

Free floating design improves speed and sensitivity

Materials: Aluminum, brass, hardened stainless steel

110

1", 1-1/4", 1-1/2" conn.

Piston-type pressure relief valve

Guide vane seat stabilizes flow for vibration reduction

Free floating design improves speed and sensitivity

Removable valve bonnet: no disturbance of fluid line connections

Materials: Aluminum, brass, ductile iron, hardened stainless steel

THROTTLING VALVE OPTION

23520

1/2", 3/4" male inlet and female outlet conn.

Throttling valve

Material: Polypropylene

MATERIAL	CODE
Aluminum	AL
Brass	No code
Ductile Iron	No code
Hardened stainless steel	HSS
Nylon/Aluminum	NY
Polypropylene	PP

See Trademark Registration and Ownership, page i-1.

ORDERING INFORMATION

PRESSURE RELIEF/REGULATING VALVE

Valve Type – Inlet/ Outlet Conn. – Material Code – Pressure Rating (psi)

Example: 6815 – 1/2 – AL – 50

BSPT connections require the addition of a "B" prior to the inlet connection.
Pressure rating is ordered in psi.

THROTTLING VALVE

Valve Type – Inlet/ Outlet Conn. – Material Code

Example: 23520 – 1/2 – PP

BSPT connections require the addition of a "B" prior to the inlet connection.

SOLENOID VALVES

- On/off flow control in automatically operated systems
- Dependable performance in air and liquid lines with temperatures from 40° to 165°F (5° to 75°C)
- Ten watt, class "F" coils are for continuous duty; UL and CSA approved; suitable for international use
- Encapsulated coil resists high humidity and fungus growth
- 360° rotation available with durable electrostatically powder-coated enclosure
- Stainless steel pilot orifice helps eliminate premature leaking and increases service life in high flow velocity situations
- Floating plungers automatically compensate for vibration, shock, wear and deformation while providing a bubble-tight seal
- Versatile mounting in any position; direct pipe mounting

SOLENOID VALVE OPTIONS

2-Way

1/4", 3/8", 1/2", 3/4", 1" conn.

Direct-acting poppet or pilot-operated diaphragm valve action

Materials: Brass, stainless steel

3-Way

1/4", 3/8", 1/2" conn.

Poppet or diaphragm valve action

Materials: Brass, stainless steel

ORDERING INFORMATION

COMPLETE SOLENOID VALVE*

Model No.	Example
	11438-20

BSPT connections require the addition of a "B" prior to the inlet connection.

*110 or 120 V, 50/60 Hz coil is standard. If other coil assemblies are desired, add the appropriate letter code to the end of the part number. For example: 11438-20A.

A = 220 or 240 V, 50/60 Hz

B = 24 V, 60 Hz

C = 12 VDC

D = 24 VDC

LIQUID AND AIR PRESSURE REGULATORS

- Diaphragm-type non-relieving liquid pressure regulators
  - Operating temperature range: 35° to 200°F (2° to 93°C)
  - Gauges supplied separately
- Diaphragm-type, relieving and non-relieving style air pressure regulators
  - Relieving style automatically relieves excessive air pressure in a regulated line; non-relieving types also available
  - Regulated line pressure can be reduced with adjusting knob even when line is dead ended
  - Operating temperature range: 0° to 175°F (-15° to +80°C) with dew point less than air temperatures below 35°F (2°C)
  - Gauges supplied separately

REGULATOR OPTIONS

11438 Air Pressure Regulator

Diaphragm, relieving and non-relieving types

Regulated pressures from 5 to 125 psi (0.3 to 8.5 bar) with supply line pressures up to 300 psi (20 bar)

Materials: Die cast aluminum, stainless steel, zinc

11438 Liquid Pressure Regulator

Non-relieving type

Regulated pressures from 5 to 125 psi (0.3 to 8.5 bar) with primary supply line pressures

Max. pressure: 400 psi (28 bar)

Materials: Brass, brass-plated zinc or stainless steel

LIQUID PRESSURE GAUGES

- Easy-to-read gauges with bottom inlet connection or center back connection
- Patented spring-suspended movement protected by a corrosion- and impact-resistant ABS housing with polycarbonate window
- Dual scales: psi and bar
- Grade B accuracy within ±2% in the middle 50% of the scale, with 3% accuracy in the high and low ends of the scale
- 0 psi to a maximum of 300 psi (0 bar to a maximum of 20 bar)
- Materials: All wetted parts are brass; combination brass/bronze connection; bourdon tube

GAUGE OPTIONS

26383

1/8", 1/4" center back male conn.
2" (51 mm) dia. housing

26385

1/4" bottom male conn.
2-1/2" (64 mm) dia. housing

ORDERING INFORMATION

OVERVIEW: HOSES AND MOUNTING BASES

- Bendable hoses stay in place once they are positioned
  - – Works with a variety of nozzle types
  - – Lengths: 6", 12", 18", 24", 30" and 36" (15, 30, 46, 61, 76 and 91 cm)
  - – Max. pressure: 250 psi (17.5 bar)
  - – Max. operating temperature: air – 250°F (121°C); liquid – 200°F (93°C)
  - – Max. operating flow at 250 psi (17.5 bar): 33 scfm (934 Nlpm)
- Magnetic mounting bases provide fast, easy set-up of nozzles
  - – Shut-off valve assembled on base

STAY-N-PLACE HOSE OPTIONS

57020

1/4" male x 1/4" female conn.

57025

1/4" male x 1/4" male conn.

MAGNETIC MOUNTING BASE OPTIONS

57045

Single or double outlet

ORDERING INFORMATION

STAY-N-PLACE HOSES

Model No.	–	Hose Length

Example: **57020** – **6**

BSPT connections require the addition of a "B" prior to the model number. Example: B57020
Hoses are ordered in inch lengths.

MAGNETIC MOUNTING BASE

Base No.	–	Outlet Number

Example: **57045** – **001**

Use 001 for single outlet; 002 for double outlet
BSPT connections require the addition of a "B". Example: B57045

Spraying Systems Co. reserves the right to make changes in specifications or design of the products shown in the catalog or to add improvements at anytime without notice or obligation.

(1) MODIFICATION OF TERMS
Seller's acceptance of any order is expressly subject to Buyer's assent to each and all of the terms and conditions set forth below and Buyer's assent to these terms and conditions shall be conclusively presumed from Buyer's receipt of this document without prompt written objection thereto or from Buyer's acceptance of all or any part of goods ordered. No addition to or modification of said terms and conditions shall be binding upon Seller unless specifically agreed to by Seller in writing. If Buyer's purchase order or other correspondence contains terms or conditions contrary to or in addition to the terms and conditions set forth below, acceptance of any order by Seller shall not be construed as assent to such contrary or additional terms and conditions or constitute a waiver by Seller of any of the terms and conditions.

(2) PRICE
Unless otherwise specified: (a) all prices, quotations, shipments and deliveries by Seller are (i) EXW (Incoterms® 2010) if shipped to the Buyer within the United States, and (2) in all other circumstances DAP Buyer's location (Incoterms® 2010); (b) all base prices together with related extras and deductions, are subject to Seller's price in effect at the time of shipment; and (c) notwithstanding the use of the shipping term DAP and without any effect on the point at which the risk of loss shifts from Seller to Buyer, all transportation, import costs and other related charges are for the account of Buyer, including all increases or decreases in such charges prior to shipment. Payment of said price shall be due at the remittance address shown on the Seller's invoice upon receipt of Seller's invoice unless otherwise specified. Interest will be charged at a rate of 1 to 1-1/2% per month on all balances outstanding more than 30 days after the date of the invoice. Price includes Seller's standard packaging. Special packaging requirements shall be quoted at an additional price.

(3) UNIFORM COMMERCIAL CODE
THIS IS A CONTRACT FOR THE SALE OF GOODS. SELLER AND BUYER EXPRESSLY AGREE THAT ANY SERVICES PROVIDED PURSUANT TO THIS CONTRACT ARE MERELY INCIDENTAL TO THE SALE OF GOODS, AND AS SUCH, SHALL BE DEEMED GOODS UNDER ARTICLE 2 OF THE UNIFORM COMMERCIAL CODE. SELLER AND BUYER FURTHER AGREE THAT ANY DISPUTES ARISING FROM THIS CONTRACT SHALL BE GOVERNED BY ARTICLE 2 OF THE UNIFORM COMMERCIAL CODE.

(4) MINIMUM BILLING
Contact your regional office representative for any minimum order requirements.

(5) WARRANTIES
Seller warrants that its products will conform to and perform in accordance with the products' specifications. Seller warrants that the products do not infringe upon any copyright, patent, or trademark. THE FOREGOING WARRANTIES ARE IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THOSE CONCERNING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

(6) LIMITATION OF REMEDIES
Buyer's remedies under this warranty shall be limited to the replacement, repair, or refund of the purchase price for any defective product at the Seller's option. Products claimed to be defective and for which repair or replacement is desired shall be, if requested by the Seller, returned transportation prepaid to Seller's plant for inspection. Results of ordinary wear and tear, improper operation, or maintenance or use of corrosive or abrasive materials shall not be considered a defect in material or workmanship. Any component part manufactured by another is not covered by Seller's warranty, but only by such warranty as its manufacturer gives. Because of the difficulty of asserting and measuring damages hereunder, it is agreed that, except for claims for bodily injury, Seller's liability to the Buyer or any third party, for any losses or damages, whether direct or otherwise, arising out of the purchase of product from Seller by Buyer shall not exceed the total amount billed and billable to the Buyer for the product hereunder. IN NO EVENT WILL SELLER BE LIABLE FOR ANY LOSS OF PROFITS OR OTHER SPECIAL OR CONSEQUENTIAL DAMAGES, EVEN IF SELLER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

(7) QUALITY ASSURANCE
Seller shall have no obligation to ensure that any goods purchased from Seller meet any special Buyer quality assurance specifications and/or other special Buyer requirements unless such specifications and/or other requirements are specifically set forth in Buyer's purchase order and expressly accepted by Seller. In the event that any such goods supplied by Seller in connection therewith, are applied to an end use without the appropriate specification and/or other requirement therefore having been set forth in Buyer's purchase order and expressly accepted by Seller, Buyer shall indemnify and hold Seller harmless against any and all damages or claims for damages made by any person for any injury, fatal or nonfatal, to any person or for any damage to the property of any person incident to or arising out of such application.

(8) PRODUCT DISPOSAL & SUSTAINABILITY
Buyer is responsible for the disposal of goods supplied by seller in accordance with all applicable laws, regulations, and responsible recycling and/or sustainability practices.

(9) CLAIMS
Claims respecting the condition of goods, compliance with specifications or any other matter affecting goods shipped to Buyer must be made promptly and, unless otherwise agreed to in writing by Seller, in no event later than one (1) year after receipt of the goods buy Buyer. In no event shall any goods be returned, reworked or scrapped by Buyer without the express written authorization of Seller.

(10) DEFAULT IN PAYMENT
If Buyer fails to make payments on any contract between Buyer and Seller in accordance with Seller's terms, Seller, in addition to any other remedies available to it, may at its option, (i) defer further shipments until such payments are made and satisfactory credit arrangements are reestablished or (ii) cancel the unshipped balance of any order.

(11) TECHNICAL ASSISTANCE
Unless otherwise expressly stated by Seller, (a) any technical advice provided by Seller with respect to the use of goods furnished to Buyer shall be without charge; (b) Buyer shall have sole responsibility for selection and specification of the goods appropriate for the end use of such goods.

(12) SAFETY PRECAUTIONS
Buyer shall require its employees to use all safety devices, and proper safe operation procedures as set forth in manuals and instruction sheets furnished by Seller. Buyer shall not remove or modify any such device or warning sign. It is the Buyer's responsibility to provide all means that may be necessary to effectively protect all employees from serious bodily injury which otherwise may result from the method of particular use, operation, set up or service of the goods. The operator's or machine manual, ANSI safety standards, OSHA regulations and other sources should be consulted. If Buyer fails to comply with provisions of this paragraph or the applicable standards and regulations aforementioned, and a person is injured as a result thereof, Buyer agrees to indemnity and save Seller harmless from any liability or obligation incurred by Seller.

(13) CANCELLATION
Orders for goods specifically manufactured for Buyer cannot be canceled or modified by Buyer, and releases cannot be held up by Buyer, after such goods are in process except with the express written consent of Seller and subject to conditions then to be agreed upon which shall include, without limitation, protection of Seller against all loss.

(14) PATENTS
The Seller shall not be liable for any costs or damages incurred by the Buyer as a result of any suit or proceeding brought against Buyer so far as based on claims (a) that use of any product, or any part thereof furnished hereunder, in combination with products not supplied by the Seller or (b) that a manufacturing or other process utilizing any product, or any part thereof furnished hereunder, constitute knowing and willful infringement of patents or trademarks arising from compliance with Buyer's designs or specifications or instructions.

(15) COMPLETE AGREEMENT
THIS CONTRACT SETS FORTH THE ENTIRE AGREEMENT AND UNDERSTANDING OF THE PARTIES RELATING TO THE SUBJECT MATTER HEREOF, AND SUPERSEDES ALL PRIOR AGREEMENTS, DISCUSSIONS AND UNDERSTANDINGS BETWEEN THEM WHETHER ORAL OR WRITTEN, RELATING TO THE SUBJECT MATTER HEREOF.

(16) GOVERNING LAW
All orders are accepted by Seller at its mailing address in Wheaton, Illinois, and shall be governed by and interpreted in accordance with the laws of the State of Illinois. The United Nations Convention on Contacts for the International Sale of Goods of April 11, 1980 shall be excluded.

(17) FORCE MAJEURE
Neither party shall be in default of its obligations to the other party for any period of Force Majeure. "Force Majeure" shall mean any delay or failure of a party to perform its obligations to the other party due to causes beyond its control and without its fault or negligence. This shall include, without limitation, Acts of God, strike, civil commotion, acts of government, and any other comparable, non-foreseeable, and a serious event.

(18) CONFIDENTIAL INFORMATION
Buyer shall maintain Confidential Information in confidence using the same care as used for its own Confidential Information. Buyer shall not disclose or divulge any Confidential Information received by it from Seller in connection with any products or services supplied by Seller to Buyer or to a third party without prior written consent of Seller, and Buyer may not use any Confidential Information for any purpose other than for the manufacture, sale and maintenance of Buyer's products. For the purposes hereof, "Confidential Information" includes any and all information and data, including, but not limited to, any business, commercial, intellectual property, technical information and data disclosed by Seller to Buyer in connection with the sale of Seller's products to Buyer, or relating to Seller's business relationship or the definition, development, marketing, selling, manufacture or distribution of Seller's products, whether disclosed orally, in writing or electronically, and irrespective of the medium in which such information or data is embedded, whether in tangible form or contained in an intangible storage medium. Confidential Information shall include any copies or abstracts made thereof, as well as any product, apparatus, modules, samples, prototypes or parts thereof.

(19) FAIR PRACTICES
Spraying Systems Co. considers for employment and hire qualified candidates without regard to race, religion, color, sex, sexual orientation, gender, gender identity, age, national origin, ancestry, citizenship, protected veteran or disability status or any factor prohibited by law, and as such affirms in policy and practice to support and promote the concept of equal employment opportunity and affirmative action, in accordance with all applicable federal, state, provincial and municipal laws.

In each product section, you'll find ordering examples. Start by reviewing the example and then create the part number by indicating the inlet connection, material and capacity size.

Inlet Conn.	Nozzle Type	–	Material Code	Capacity Size

Example

1/4	G	–	SS	10

NOZZLE BODY			SPRAY TIP	
Inlet Conn.	Body Type	+	Tip Type	Spray Angle	Capacity Size

Example

1/4	QPPM	+	QMVV	50	02

Inlet Conn.	–	Strainer Type	–	Material Code	–	Mesh Size

Example

1/4	–	TWD	–	SS	–	100

For your convenience, there are multiple ways to place an order: phone, fax and online

In North America
Phone: 1.800.95.SPRAY | Fax: 1.888.95.SPRAY

Outside North America
Phone: 1.630.665.5000 | Fax: 1.630.260.0842

Online ordering with a credit card is also available. Visit **spray.com/ispray**. You'll find helpful selection tools and a Live Chat option for immediate assistance.

FINDING PRODUCTS

- Consult the Product Index on **page i-4** if you know the name of the product
- Consult the Part Number Index on **page i-8** if you have the part number. Part numbers are shown numerically and alphanumerically
- If you're not sure what you need, our Selection Guidelines on **pages 10-11** will help you identify products typically used in dozens of applications

Selection assistance is also available by calling **1.800.95.SPRAY.** Representatives in your local sales office will help you determine which products best meet your application requirements. (Call **1.630.665.5000** outside North America or visit **spray.com** to find information for the sales office in your area.)
